and newly designed instruction. As educators, how can we prepare students to succeed and thrive in this rapidly evolving, technology-rich, global community? This action tool defines the skills and knowledge that students need for the 21st century and provides tools that you can use with any content to help teach and reinforce those skills. Based on the work of the Partnership for 21st Century Skills, the framework for 21st century learning described in this action tool is built on a foundation of academic subject knowledge that students apply through the essential skills of critical thinking and problem solving, creativity and innovation, communication, and collaboration. Use the instructional planning tools to design a well-

rounded set of learning opportunities that integrate the important aspects of 21st century literacies into your lessons. Then choose from 45 ready-to-use classroom tools to help students learn and practice the 21st century skills in any content area. Each tool includes step-by-step instructions, suggestions for integrating technology, and reflection questions that promote students' metacognition. To teach 21st century skills is to teach students a process of thinking about what they are learning. The goal is for students to think independently about content and seek answers to their own questions. The tools and activities in this book can help you guide students through a variety of models and processes that allow

them to make analytical thinking routine. With these methods, you ensure that each new generation of learners is equipped for the world of their future rather than the world of our past.

This anthology introduces the Framework for 21st Century Learning from the Partnership for 21st Century Skills as a way to re-envision learning and prepare students for a rapidly evolving global and technological world. Highly respected education leaders and innovators focus on why these skills are necessary, which are most important, and how to best help schools include them in curriculum and instruction.

"In Education Nation author Milton Chen draws from extensive experience in media--from his work on Sesame Street in its nascent years to his current role as executive director of the George Lucas Educational Foundation--to support his vision for a new world of learning. Presented in five parts and divided into "module" chapters, this book examines the ways in which K-12 learning can be revolutionized through innovative reform and the use of technology. Due in large part to new technologies, over the last few decades we've witnessed a huge shift in how we imagine teaching and learning. A good example is the educational revolution sparked by Sesame

Street--which in its first season had a goal of teaching preschool-age children the numbers 1 to 10. At the time, experts dismissed it as an unrealistic goal since many kindergarten students were having trouble mastering this simple counting. Yet the research proved that preschool-age children learned those skills and many others directly from the TV screen. Now Sesame Street's curriculum teaches the numbers from 1 to 40. In today's digital age the number of new ways to teach and learn is ever-expanding and includes: television, Google, YouTube, TeacherTube, Facebook, iPhones, video games, GPS devices, open source textbooks, interactive whiteboards; and there are countless examples of ways technology positively

impacts student learning--from voice-recognition software that helps children learn to read to translation tools that help teachers communicate with non-English speaking parents. As a result of constant innovation, learning is no longer limited by traditional confines and we're quickly moving beyond students tied to their chairs, desks, and textbooks--and teachers locked away in classrooms."--

Americans have long recognized that investments in public education contribute to the common good, enhancing national prosperity and supporting stable families, neighborhoods, and communities. Education is even more critical today, in the face of economic, environmental, and social challenges. Today's children can meet future challenges if their schooling and informal learning activities prepare them for adult roles as citizens, employees, managers, parents,

volunteers, and entrepreneurs. To achieve their full potential as adults, young people need to develop a range of skills and knowledge that facilitate mastery and application of English, mathematics, and other school subjects. At the same time, business and political leaders are increasingly asking schools to develop skills such as problem solving, critical thinking, communication, collaboration, and self-management - often referred to as "21st century skills." Education for Life and Work: Developing Transferable Knowledge and Skills in the 21st Century describes this important set of key skills that increase deeper learning, college and career readiness, student-centered learning, and higher order thinking.

These labels include both cognitive and non-cognitive skills- such as critical thinking, problem solving, collaboration, effective communication, motivation, persistence, and learning to learn. 21st century skills also include creativity, innovation, and ethics that are important to later success and may be developed in formal or informal learning environments. This report also describes how these skills relate to each other and to more traditional academic skills and content in the key disciplines of reading, mathematics, and science. Education for Life and Work: Developing Transferable Knowledge and Skills in the 21st Century summarizes the findings of the research that investigates the importance of such skills to success

in education, work, and other areas of adult responsibility and that demonstrates the importance of developing these skills in K-16 education. In this report, features related to learning these skills are identified, which include teacher professional development, curriculum, assessment, after-school and out-of-school programs, and informal learning centers such as exhibits and museums.

Of the 21st century skills vital for success in education and the workplace, "the 4Cs"—critical thinking, communication, collaboration, and creativity—have been highlighted as crucial competencies. This book shows how teachers can
