Adorno: A Critical Guide - Humanities-Ebooks
While Adorno 's critical comments in the seminar seem to be applicable to some of Marx 's bold assertions about Hegel 's dialectic, taken in isolation, they fail to challenge Marx 's more rigorous analysis of the dialectic, as presented in his introduction to the Grundrisse. Nevertheless, read alongside Adorno 's mature critique of identity, the text of the seminar could be interpreted as pointing to a much more serious criticism of Marx, that is, the criticism of the primacy of economy ...

Adorno, Marx, dialectic - Aidin Keikhaee, 2020
Aesthetic Theory (German: Ästhetische Theorie) is a book by the German philosopher Theodor Adorno, which was culled from drafts written between 1956 and 1969 and ultimately published posthumously in 1970.

This new introduction offers a comprehensive and accessible account of Adorno's work. Jarvis discusses the intellectual and institutional contexts for Adorno's thought and, in a broad-ranging study, examines his contributions to social theory, cultural theory, aesthetics, and philosophy. He shows how a re-examination of Adorno's work from the perspective of classical German philosophy allows us to see him from a new and illuminating angle, and ultimately to achieve a fuller understanding of all his thought.

The range of Adorno's achievement, and the depth of his insights, is breathtaking and daunting. His work on literary, artistic, and musical forms, his devastating indictment of modern industrial society, and his profound grasp of Western culture from Homer to Hollywood have made him one of the most significant figures in twentieth-century thought. As one of the main philosophers of the Frankfurt School of Critical Theory, Adorno 's influence on literary theory, cultural studies, and philosophical aesthetics has been immense. His wide-ranging authorship is significant also to continental philosophy, political theory, art criticism, and musicology. Key ideas discussed in this guide include: art and aesthetics fun and free time nature and reason things, thoughts and being right This Routledge Critical Thinkers guide will equip readers with the tools required to critically interpret Adorno 's major works, whilst also introducing readers to his interpretation of classical German philosophy and his relationship to the most significant of his contemporaries.

Theodor W. Adorno (1903 – 1969) was one of the twentieth century 's most important thinkers. In light of two pivotal developments—the rise of fascism, which culminated in the Holocaust, and the standardization of popular culture as a commodity indispensable to contemporary capitalism—Adorno sought to evaluate and synthesize the essential insights of Western philosophy by revisiting the ethical and sociological arguments of his predecessors: Kant, Nietzsche, Hegel, and Marx. This book, first published in Germany in 1986, provides a succinct introduction to Adorno 's challenging and far-reaching thought. Gerhard Schweppenh ä user, a leading authority on the Frankfurt School of critical theory, explains Adorno 's epistemology, social and political philosophy, aesthetics, and theory of culture. After providing a brief overview of Adorno 's life, Schweppenh ä user turns to the theorist 's core philosophical concepts, including post-Kantian critique, determinate negation, and the primacy of the object, as well as his view of the Enlightenment as a code for world domination, his diagnosis of modern mass culture as a program of social control, and his understanding of modernist aesthetics as a challenge to conceive an alternative politics. Along the way, Schweppenh ä user illuminates the works widely considered Adorno 's most important achievements: Minima Moralia, Dialectic of Enlightenment (co-authored with Horkheimer), and Negative Dialectics. Adorno wrote much of the first two of these during his years in California (1938 – 49), where he lived near Arnold Schoenberg and Thomas Mann, whom he assisted with the musical aesthetics at the center of Mann 's novel Doctor Faustus.

The writings of the Frankfurt school, in particular of Horkheimer, Adorno, Marcuse, and Jurgen Habermas, caught the imagination of theradical movements of the 1960s and 1970s and became a key elementin the Marxism of the New Left. Partly due to their rise to prominence during the political turmoilof the 1960s, the work of these critical theorists has been thesubject of continuing controversy in both political and academicircles. However, their ideas are frequently misunderstood. In this major work, now available from Polity Press, David Heldpresents a much-needed introduction to, and evaluation of, criticaltheory. Some of the major themes he considers are critical theory'srelation to Marx's critique of political economy, Freudianpsychoanalysis, aesthetics and the philosophy of history. There isalso an extended discussion of critical theory's substantivecontribution to the analysis of capitalism, culture, the family, the individual, as well as its contribution to epistemology andmethodology.

"Critical Models' combines two of Adorno's most important postwar works - 'Interventions' and 'Catchwords'--And addresses issues such as the dangers of ideological conformity, the fragility of democracy, educational reform, the influence of television and radio and the aftermath and continuity of racism.

The writings of the Frankfurt school, in particular of Horkheimer, Adorno, Marcuse, and Jurgen Habermas, caught the imagination of the radical movements of the 1960s and 1970s and became a key element in the Marxism of the New Left. Partly due to their rise to prominence during the political turmoil of the 1960s, the work of these critical theorists has been the subject of continuing controversy in both political and academic circles. However, their ideas are frequently misunderstood. In this major work, now available from Polity Press, David Held presents a much-needed introduction to, and evaluation of, critical theory. Some of the major themes he considers are critical theory's relation to Marx's critique of political economy, Freudian psychoanalysis, aesthetics and the philosophy of history. There is also an extended discussion of critical theory's substantive contribution to the analysis of capitalism, culture, the family, the individual, as well as its contribution to epistemology and methodology.

This volume comprises Adorno's first lectures specifically dedicated to the subject of the dialectic, a concept which has been key to philosophical debate since classical times. While discussing connections with Plato and Kant, Adorno concentrates on the most systematic development of the dialectic in Hegel's philosophy, and its relationship to Marx, as well as elaborating his own conception of dialectical thinking as a critical response to this tradition. Delivered in the summer semester of 1958, these lectures allow Adorno to explore and probe the significant difficulties and challenges this way of thinking posed within the cultural and intellectual context of the post-war period. In this connection he develops the thesis of a complementary relationship between positivist or functionalist approaches, particularly in the social sciences, as well as calling for the renewal of ontological and metaphysical modes of thought which attempt to transcend the abstractness of modern social experience by appeal to regressive philosophical categories. While providing an account of many central themes of Hegelian thought, he also alludes to a whole range of other philosophical, literary and artistic figures of central importance to his conception of critical theory, notably Walter Benjamin and the idea of a constellation of concepts as the model for an 'open or fractured dialectic' beyond the constraints of method and system. These lectures are seasoned with lively anecdotes and personal recollections which allow the reader to glimpse what has been described as the 'workshop' of Adorno's thought. As such, they provide an ideal entry point for all students and scholars in the humanities and social sciences who are interested in Adorno's work as well as those seeking to understand the nature of dialectical thinking.

Theodor W. Adorno (1903-69) was one of the foremost philosophers and social theorists of the post-war period. Crucial to the development of Critical Theory, his highly original and distinctive but often difficult writings not only advance questions of fundamental philosophical significance, but provide deep-reaching analyses of literature, art, music sociology and political theory. In this comprehensive introduction, Brian O'Connor explains Adorno's philosophy for those coming to his work for the first time, through original new lines of interpretation. Beginning with an overview of Adorno's life and key philosophical views and influences, which contextualizes the intellectual environment in which he worked, O'Connor assesses the central elements of Adorno's philosophy. He carefully examines Adorno's distinctive style of analysis and shows how much of his work is a critical response to the various forms of identity thinking that have underpinned the destructive forces of modernity. He goes on to discuss the main areas of Adorno's philosophy: social theory, the philosophy of experience, metaphysics, morality and aesthetics; setting out detailed accounts of Adorno's notions of the dialectic of Enlightenment, reification, totality, mediation, identity, nonidentity, experience, negative dialectics, immanence, freedom, autonomy, imitation and autonomy in art. The final chapter considers Adorno's philosophical legacy and importance today. Including a chronology, glossary, chapter summaries, and suggestions for further reading, Adorno is an ideal introduction to this demanding but important thinker, and essential reading for students of philosophy, literature, sociology and cultural studies.
