This iPad interactive book is an indispensable tool for pilots seeking the Airbus A320 type rating. This study guide offers an in-depth systems knowledge with pictures, videos and schematics not found in other publications. It is packed with detailed and useful information to prepare any candidate for command and responsibility of the A320 equipped with IAE or CFM engines.

The official FAA guide to aircraft weight and balance.

The major objective of this book was to identify issues related to the introduction of new materials and the effects that advanced materials will have on the durability and technical risk of future civil aircraft throughout their service life. The committee investigated the new materials and structural concepts that are likely to be incorporated into next generation commercial aircraft and the factors influencing application decisions. Based on these predictions, the committee attempted to identify the design, characterization, monitoring, and maintenance issues that are critical for the introduction of advanced materials and structural concepts into future aircraft.

Download Ebook Airbus Tool Equipment Manual

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

This book is developed using material and pilot training notes including official Airbus FCOM, FCTM and the QRH to allow Pilots to study as a refresher or prepare for their command upgrade. It covers failure management, ECAM, Airbus memory item drills, complex and demanding failures, technical reviews on systems, limitations, low visibility procedures, RVSM/PBN, MEL/CDL and supplementary information covering cold weather and icing, windshears, weather and wake turbulence. The memory item drills include: Loss of braking, Emergency descent, Stall recovery, Stall warning at lift-off, Unreliable airspeed, GPWS/EGPWS warnings and cautions, TCAS warnings and Windshears. The complex and demanding failure chapter goes in depth with failures such as: Dual Bleed faults, Smoke/Fumes cases, Dual FMGC failure, Engine malfunctions of all levels, Fuel leak, Dual Hydraulic faults, Landing gear problems, Rejected takeoff and evacuation, Upset preventions and much more. Technical revision gives a good study highlight for all the Airbus A320 systems including Air conditioning, Ventilation and Pressurisation, Electrical, Hydraulics, Flight-Controls and Automation, Landing gear, Pneumatics, etc. The later chapters of the book covers useful topics such as aircraft limitations, low visibility procedures, RVSM/PBN, MEL, CDL and other supplementary information such as cold weather and icing, turbulence and windshears in more detail. The book will no doubt be a great asset to any trainee or existing Airbus Pilot for both revision and training purposes including refresher training.

The aircraft manufacturer Airbus was established in 1970 by the French, German and UK governments (with the Spanish government joining a year later) in order to develop a coordinated and collaborative European response to the dominance of the global civil aviation market by American companies. Since October 2006, following the decision by BAE Systems to sell its stake in the company, Airbus has been wholly owned by EADS (a joint venture between its French, German and Spanish parent companies). Recent Developments with Airbus (HC 427-I) examines recent challenges faced by Airbus, including reduced competitiveness as a result of the weak US dollar, delays and cost overruns in its flagship A380 aircraft, its restructuring programme, and the financing of the A350 XWB project. It also looks at the future role for the UK Government and the Regional Development Agencies, the implementation of the UK's National Aerospace Technology Strategy, and the impact of the current World Trade Organization (WTO) dispute between the US and the European Union (EU) over government subsidies. Given the fact that the sale of BAE's stake in the company has left the UK without a significant shareholding in
