AR 25-2 10/24/2007 INFORMATION ASSURANCE ; Survival Ebooks

On Nov. 5, 2010, a gunman opened fire at the Soldier Readiness Center at Fort Hood, Texas. Thirteen people were killed and 43 others were wounded or injured. Following the shooting, Defense Sec. Robert M. Gates established the Dept. of Defense Independent Review Related to Fort Hood to address questions about the degree to which the entire Dept. is prepared for similar incidents in the future -- especially multiple, simultaneous incidents. This report includes, but is not limited to: identifying and monitoring potential threats; providing time-critical information to the right people; employing force protection measures; and planning for and responding to incidents.

AR 350-1 08/19/2014 ARMY TRAINING AND LEADER DEVELOPMENT ; Survival Ebooks

Army Regulation 350-1 is the keystone training regulation for all US Army units. This regulation is the source reference for all training conducted within units across the US Army. This continent 6x9 paperback is designed with commanders, executive officers, and company grade NCOs in mind for portability and ease of use.

Extremist Propaganda in Social Media: A Threat to Homeland Security presents both an analysis of the impact of propaganda in social media and the rise of extremism in mass society from technological and social perspectives. The book identifies the current phenomenon, what shall be dubbed for purposes of this book "Blisstopian Societies"—characterized in the abiding "ignorance is bliss" principle—whereby a population is complacent and has unquestioning acceptance of a social doctrine without challenge and introspection. In these subcultures, the malleable population self-select social media content, "news," and propaganda delivery mechanisms. By doing so, they expose themselves only to content that motivates, reinforces, and contributes to their isolation, alienation, and self-regulation of the social groups and individuals. In doing this, objective news is dismissed, fake—or news otherwise intended to misinform—reinforces their stereotyped beliefs about society and the world around them. This phenomenon is, unfortunately, not "fake news," but a real threat to which counterterror, intelligence, Homeland Security, law enforcement, the military, and global organizations must be hyper-vigilant of, now and into the foreseeable future. Chapters cite numerous examples from the 2016 political election, the Russia investigation into the Trump Campaign, ISIS, domestic US terrorists, among many other examples of extremist and radicalizing rhetoric. The book illustrates throughout that this contrived and manufactured bliss has fueled the rise and perpetuation of hate crimes, radicalism, and violence in such groups as ISIS, Boko Haram, Neo-Nazis, white separatists, and white supremacists in the United States—in addition to perpetuating ethnic cleansing actions around the world. This dynamic has led to increased political polarization in the United States and abroad, while furthering an unwillingness and inability to both compromise or see others ' perspectives—further fomenting insular populations increasing willing to harm others and do violence. Extremist Propaganda in Social Media relates current Blisstopian practices to real-world hate speech and violence, connecting how such information is consumed by groups and translated into violent action. The book is an invaluable resource for those professionals that require an awareness of social media radicalization including: social media strategists, law enforcement, Homeland Security professionals, military planners and operatives—anyone tasked with countering combat such violent factions and fringes in conflict situations.
