For undergraduate and graduate Auditing, Professional Research Case or capstone courses. Step through
real auditing cases one by one in this comprehensive text. Auditing Cases, through a unique active
learning approach, provides a comprehensive case book focusing on various auditing activities. Students
learn to think critically and develop their interpersonal skills, which are increasingly important in the
workplace. The fifth edition includes several new and updated cases.

The revised 13th edition of the essential reference for the prescribing of drugs for patients with mental
health disorders The revised and updated 13th edition of The Maudsley Prescribing Guidelines in
Psychiatry provides up-to-date information, expert guidance on prescribing practice in mental health,
including drug choice, treatment of adverse effects and how to augment or switch medications. The text
covers a wide range of topics including pharmacological interventions for schizophrenia, bipolar
disorder, depression and anxiety, and many other less common conditions. There is advice on
prescribing in children and adolescents, in substance misuse and in special patient groups. This world-
renowned guide has been written in concise terms by an expert team of psychiatrists and specialist
pharmacists. The Guidelines help with complex prescribing problems and include information on
prescribing psychotropic medications outside their licensed indications as well as potential interactions
with other medications and substances such as alcohol, tobacco and caffeine. In addition, each of the
book's 165 sections features a full reference list so that evidence on which guidance is based can be
readily accessed. This important text: Is the world's leading clinical resource for evidence-based
prescribing in day-to-day clinical practice and for formulating prescribing policy Includes referenced
information on topics such as transferring from one medication to another, prescribing psychotropic
medications during pregnancy or breastfeeding, and treating patients with comorbid physical conditions,
including impaired renal or hepatic function. Presents guidance on complex clinical problems that may
not be encountered routinely Written for psychiatrists, neuropharmacologists, pharmacists and clinical
psychologists as well as nurses and medical trainees, The Maudsley Prescribing Guidelines in Psychiatry
are the established reference source for ensuring the safe and effective use of medications for patients
presenting with mental health problems.

This crucial book addresses newer practices of resource allocation which tie university funding to
indicators of performance. It covers the evolution of mass higher education and the associated
curtailment of funding, the public management reform debate within which performance-based
budgeting or funding evolved, and sketches alternative governance and management modes which can
be used instead. Four appendices cover more technical matters.

Over the past two decades bioscience facilities worldwide have experienced multiple safety and security
incidents, including many notable incidents at so-called "sophisticated facilities" in North America and
Western Europe. This demonstrates that a system based solely on biosafety levels and security
regulations may not be sufficient. Setting the stage for a substantively different approach for managing
the risks of working with biological agents in laboratories, Laboratory Biorisk Management: Biosafety
and Biosecurity introduces the concept of biorisk management—a new paradigm that encompasses both
laboratory biosafety and biosecurity. The book also provides laboratory managers and directors with the
information and technical tools needed for its implementation. The basis for this new paradigm is a three-
pronged, multi-disciplinary model of assessment, mitigation, and performance (the AMP model). The

application of the methodologies, criteria, and guidance outlined in the book helps to reduce the risk of laboratories becoming the sources of infectious disease outbreaks. This is a valuable resource for those seeking to embrace and implement biorisk management systems in their facilities and operations, including the biological research, clinical diagnostic, and production/manufacturing communities.

Social software has taken the Internet by storm, fuelling huge growth in collaborative authoring platforms (such as blogs, wikis and podcasts) and massive expansion in social networking communities. These technologies have generated an unprecedented level of consumer participation and it is now time for businesses to embrace them as part of their own information and knowledge management strategies. Enterprise 2.0 is one of the first books to explain the impact that social software will have inside the corporate firewall, and ultimately how staff will work together in the future. Niall Cook helps you to navigate this emerging landscape and introduces the key concepts that make up 'Enterprise 2.0'. The 4Cs model at the heart of the book uses practical examples from well known companies in a range of industry sectors to illustrate how to apply Enterprise 2.0 to encourage communication, cooperation, collaboration and connection between employees and customers in your own company. Erudite, well-researched and highly readable, this book is essential for anyone involved in knowledge, information and library management, as well as those implementing social software tools inside organizations. It will also appeal to marketing, advertising, public relations and internal communications professionals who need to exploit the opportunities social software offers for significant business impact and competitive advantage.

Drawing on a body of empirical, qualitative work spanning three decades, this unique text traces the significance of critical social research and critical analyses in understanding some of the most significant and controversial issues in contemporary society. Focusing on central debates in the UK and Ireland – prison protests; inner-city uprisings; deaths in custody; women's imprisonment; transition in the north of Ireland; the 'crisis' in childhood; the Hillsborough and Dunblane tragedies; and the 'war on terror' – Phil Scraton argues that 'marginalisation' and 'criminalisation' are social forces central to the application of state power and authority. Each case study demonstrates how structural relations of power, authority and legitimacy, establish the determining contexts of everyday life, social interaction and individual opportunity. This book explores the politics and ethics of critical social research, making a persuasive case for the application of critical theory to analysing the rule of law, its enforcement and the administration of criminal justice. It is indispensable for students in the fields of criminology, criminal justice and socio-legal studies, social policy and social work.

An updated 3rd edition of this authoritative analysis of Swiss democracy, the institutions of federalism, and consensus democracy through political power sharing. Linder analyzes the scope and limits of citizens' participation in direct democracy, which distinguishes Switzerland from most parliamentary systems.

"Bringing a different world into existence - Action Research as a trigger for innovations" was the overarching theme and vision of the international CARN Conference 2011 in Vienna. The chapters in this book are drawn mainly from conference contributions. The authors share practical knowledge which has arisen from their work, and reflect on development processes in schools, in teacher education and professional development, social work, social pedagogy, health care and community development. This book offers what some critics believe has been missing in recent action research literature, namely first person accounts of action researchers who endeavour to change working conditions and social relations in their environment through the conduct of action research. This book is also distinguished by assembling contributions from people who are linking action research to a broad diversity of differing

contexts, and who are exploring topics or issues across various applications of action research

Mobile Money is a booming industry in an increasing number of countries worldwide. The project results from increased demand for guidance and technical assistance from governments after the 2008 publication of an exploratory paper, Integrity in Mobile Phone Financial Services, which discussed mobile money and the application of international anti-money laundering (AML) and combating the financing of terrorism (CFT) standards. For most, how to craft a regulatory regime that expands access to financial services to the poor through the development of mobile phone financial services, but compliant with AML/CFT standards remains elusive. Specific AML/CFT regulations related to mobile money have not been issued in many jurisdictions, mainly due to the lack of awareness of the risks these services can pose if the right controls are not in place. Because the international standards for AML/CFT, the Financial Action Task Force's 40 + 9 Recommendations were designed and issued well before mobile money technology and business models became prevalent, even developed countries have begun to face challenges with their regulation. The project team aims to provide practical guidance to jurisdictions and the Industry on how to draft regulations and internal guidelines that allow them to comply with AML/CFT standards with enough flexibility for mobile money to thrive. Specifically, the paper (1) takes stock of new AML/CFT regulations and practices relevant to Mobile money, (2) design guidelines for drafting AML/CFT regulations that cover mobile money and (3) propose examples of best practices for the Industry to include AML/CFT in their own business model.
