Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Discusses diseases and ailments that have been connected to sex throughout history, and the reactions to them that have been shaped by religion or morality.

In *Painting Women*, Phillippy provides a cross-disciplinary study of women as objects and agents of painting.

Fascinating, fact-filled writing that delivers hundreds of years in the life of the European continent. Terrific supplementary reading for AP History students.

*Firstborn of Venice* explores issues that are political in the broadest sense: legal institutions and administrative practices, fiscal politics, the consolidation of elites, ecclesiastical management, and the contrasting governing ideologies of ruler and subjects.
