cryptozoology: (n.) The search for and study of animals whose existence or survival is unsubstantiated or in dispute, such as Sasquatch, the Loch Ness Monster, fish with human hands, the Yeti, the Thunderbird, the Ape-Man Monster of Tennessee, and the 'Thing' at Dutchman's Rig. For three decades, when American men had questions about the Yeti, the Loch Ness Monster, Bigfoot, and other weird beasts from the strange world of cryptozoology, they found answers in the hard-hitting pages of men's adventure magazines. Now, collected here for the first time ever, are samples of sensational period reporting and wild, "true" accounts of savage, fist-to-claw duels between man and Sasquatch, man and fishman, man and monster! Plus full-color vintage pulp artwork that accompanied the stories' original publication, rare archival discoveries, men's pulp history, expert analysis, cryptid-by-cryptid commentary, and much, much more. CRYPTOZOOLOGY ANTHOLOGY is packed with 13 biting tales of creatures notorious and obscure. Don't leave civilization without it! Also available as a limited edition hardcover with bonus content.

Think lake "monsters" aren't real? Don't say that after you have read these stories,

inspired by real sightings... British Columbia has lakes and seas, which attract many people to them every summer. What some of them don't know is that the places they swim in reportedly have mysterious creatures dwelling in them. Many are described as snake-like, others with dinosaurian long-necks. Yet more are decidedly strange. The Mysterious Water Creatures of British Columbia is a crypto-fiction anthology of 4 stories, all fictional & inspired by the ongoing phenomena of water creatures in British Columbia. The stories in this anthology may only come from the author's mind--but does that mean the phenomena which have inspired B.C. Hawk also not real? Perhaps--or maybe, the foundation is all too real. *Note: These stories are fictional and written in the first person for readers. I wish to point this out as to avoid confusion*

Arthur Machen: Critical Essays studies the works of Arthur Machen in twelve essays, exploring different aspects of the literary production of the Welsh writer who has won the readers and the critics' attention with works such as "The Great God Pan," "The Terror," and "The Angels of Mons."

Interest in preternatural and supernatural themes has revitalized the Gothic tale, renewed explorations of psychic powers and given rise to a host of social and religious movements based upon claims of the

fantastical. And yet, in spite of this widespread enthusiasm, the academic world has been slow to study this development. This volume rectifies this gap in current scholarship by serving as an interdisciplinary overview of the relationship of the paranormal to the artefacts of mass media (e.g. novels, comic books, and films) as well as the cultural practices they inspire. After an introduction analyzing the paranormal's relationship to religion and entertainment, the book presents essays exploring its spiritual significance in a postmodern society; its (post)modern representation in literature and film; and its embodiment in a number of contemporary cultural practices. Contributors from a number of disciplines and cultural contexts address issues such as the shamanistic aspects of Batman and lesbianism in vampire mythology. Covering many aspects of the paranormal and its effect on popular culture, this book is an important statement in the field. As such, it will be of utmost interest to scholars of religious studies as well as media, communication, and cultural studies.

A Place More Void takes its name from a scene in William Shakespeare's The Tragedy of Julius Caesar, wherein an elderly soothsayer has a final chance to warn Caesar about the Ides of March. Worried that he won't be able to deliver his message because of the crowded alleyways, the soothsayer devises a plan to

find and intercept Caesar in "a place more void." It is precisely such an elusive place that this volume makes space for by theorizing and empirically exploring the many yet widely neglected ways in which the void permeates geographical thinking. This collection presents geography's most in-depth and sustained engagements with the void to date, demonstrating the extent to which related themes such as gaps, cracks, lacks, and emptiness perforate geography's fundamental concepts, practices, and passions. Arranged in four parts around the themes of Holes, Absences, Edges, and Voids, the contributions demonstrate the fecundity of the void for thinking across a wide range of phenomena: from archives to alien abductions, caves to cryptids, and vortexes to vanishing points. A Place More Void gathers established and emerging scholars who engage a wide range of geographical issues and who express themselves not only through archival, literary, and socio-scientific investigations, but also through social and spatial theory, political manifesto, poetry, and performance art.

The ultimate quest for the world's most mysterious creatures The Loch Ness Monster, Bigfoot, the Abominable Snowman -- these are the names of the elusive beasts that have caught the eye and captured the imaginations of people around the world for centuries. Recently, tales of these "monsters" have been

corroborated by an increase in sightings, and out of these legends a new science has been born: cryptozoology -- the study of hidden animals. Cryptozoology A to Z, the first encyclopedia of its kind, contains nearly two hundred entries, including cryptids (the name given to these unusual beasts), new animal finds, and the explorers and scientists who search for them. Loren Coleman, one of the world's leading cryptozoologists, teams up with Jerome Clark, editor and author of several encyclopedias, to provide these definitive descriptions and many never-before-published drawings and photographs from eyewitnesses' detailed accounts. Full of insights into the methods of these scientists, exciting tales of discovery, and the history and evolution of this field, Cryptozoology A to Z is the most complete reference ever of the newest zoological science.

Offers a comprehensive guide to identifying animals yet to be officially recognized in science, and discusses where these animals live and why they remain a mystery.

Describes animals and monsters whose existence is in doubt, providing information on where and when they were sighted, the research being done about these creatures, and their supposed physical characteristics and behaviors.

Explores the truth and the myths behind such legendary creatures as the Loch Ness monster and Sasquatch

'Mystery Creatures of China' is one of the most exciting additions to the cryptozoological literature in years. Lake monsters, man-beasts, mystery cats, and other strange creatures reported throughout China are described for the mystery animal enthusiast. Those who enjoy reading about the folklore of other cultures will also find much to ponder.
