short- and long-term expected outcomes, nursing interventions, and client caregiver interventions. Care plans are organized by body systems to allow for quick retrieval of information. Both short-term and long-term outcomes are included in the care plans to aid evaluation of the care provided. Detailed assessment guidelines are provided for all body systems to facilitate complete and comprehensive client examinations. Guidelines for environmental and safety assessments aid in the appraisal and improvement of clients' living conditions. Client and caregiver interventions are outlined in the care plans to promote active client participation in self-care. The convenient pocket size makes transportation and use convenient to home health nurses. Appendices on

Orientation to Home Care Nursing is a comprehensive reference text that covers all aspects of home health nursing. This text can be used as a primary text for home care and community nursing courses. Or it can be used concurrently with the agency's own materials to apply learned material to daily practice or with students who are learning about home care. This companion text to the Manual of Home Care Nursing Orientation, by the same authors, provides the nurse with an in-hand reference for orientation and beyond.
