Death by China: Confronting the Dragon - A Global Call to ...

Death by China: Confronting the Dragon □ A Global Call to Action is a 2011 non-fiction book by economics professor Peter Navarro and Greg Autry that chronicles the alleged threats to America's economic dominance in the 21st century posed by China's Communist Party. A feature-length documentary film based on the book, narrated by Martin Sheen and also titled Death by China, was released in 2012.

Death by China - Wikipedia

Tearing this delusion away, Death by China documents the myriad ways that a powerful, wealthy, and corrupt Chinese Communist Party emboldened by a growing nationalistic frenzy is becoming the biggest threat to global peace, prosperity, and health since Nazi Germany.

Death by China: Confronting the Dragon - A Global Call to ...

Death by China is a first-hand look at how China is the greatest threat to America and why. It's discussed about how many Americans die daily from poisoned food, spiked drugs, toxic toys and more that all come from China. Many US Industries have partnered with China to get these items imported into the states at a fraction of the cost.

The world's most populous nation and soon-to-be largest economy is rapidly turning into the planet's most efficient assassin. Unscrupulous Chinese entrepreneurs are flooding world markets with lethal products. China's perverse form of capitalism combines illegal mercantilist and protectionist weapons to pick off American industries, job by job. China's emboldened military is racing towards head-on confrontation with the U.S. Meanwhile, America's executives, politicians, and even academics remain silent about the looming threat. Now, best-selling author and noted economist Peter Navarro meticulously exposes every form of "Death by China," drawing on the latest trends and events to show a relationship spiraling out of control. Death by China reveals how thousands of Chinese cyber dissidents are being imprisoned in "Google Gulags"; how Chinese hackers are escalating coordinated cyberattacks on U.S. defense and America's key businesses; how China's undervalued currency is damaging the U.S., Europe, and the global recovery; why American companies are discovering that the risks of operating in China are even worse than they imagined; how China is promoting nuclear proliferation in its pursuit of oil; and how the media distorts the China story--including a "Hall of Shame" of America's worst China apologists. This book doesn't just catalogue China's abuses: It presents a call to action and a survival guide for a critical juncture in America's history--and the world's. Publisher's note - in this book various quotes and viewpoints are attributed to a 'Ron Vara'. Ron Vara is not an actual person, but rather an alias created by Peter Navarro in order to present his views and opinions.

For years, China has served as the "factory floor" for global production, driving down prices for consumers worldwide. But, unfortunately, China's rapid and chaotic industrialization has put it on a collision course with the rest of the world. *The Coming China Wars* was the first book to systematically cover all those conflicts: political, economic, and environmental. Now, in this new edition, Dr. Peter Navarro has thoroughly updated the entire book. You'll find new chapters on the danger posed by China's flood of defective products and contaminated food; China's dramatic military expansion and the

Online Library Death By China Confronting The Dragon A Global Call To Action Peter Navarro

rising threat of a "hot war"; China's space program and its profound strategic implications; China's growing suppression of human rights and free speech; and much more. The coming China Wars will be fought over everything from decent jobs, livable wages, and advanced technologies to strategic resources...and eventually to our most basic of all needs: bread, water, and air. Unless all nations immediately address these impending conflicts, the results may be catastrophic. Like the First Edition, this book demands that we think much more deeply about how to stop the coming China Wars, laying out hard choices that must be made sooner rather than later. This new edition offers even more policy recommendations, including original contributions from several of the world's most important China experts. Publisher's note - in this book various quotes and viewpoints are attributed to a 'Ron Vara'. Ron Vara is not an actual person, but rather an alias created by Peter Navarro in order to present his views and opinions.

Will there be war with China? This book provides the most complete and accurate assessment of the probability of conflict between the United States and the rising Asian superpower. Equally important, it lays out an in-depth analysis of the possible pathways to peace. Written like a geopolitical detective story, the narrative encourages reader interaction by starting each chapter with an intriguing question that often challenges conventional wisdom. Based on interviews with more than thirty top experts, the author highlights a number of disturbing facts about China's recent military buildup and the shifting balance of power in Asia: the Chinese are deploying game-changing "carrier killer" ballistic missiles; some of America's supposed allies in Europe and Asia are selling highly lethal weapons systems to China in a perverse twist on globalization; and, on the U.S. side, debilitating cutbacks in the military budget send a message to the world that America is not serious about its "pivot to Asia." In the face of

Online Library Death By China Confronting The Dragon A Global Call To Action Peter Navarro

these threatening developments, the book stresses the importance of maintaining US military strength and preparedness and strengthening alliances, while warning against a complacent optimism that relies on economic engagement, negotiations, and nuclear deterrence to ensure peace. Accessible to readers from all walks of life, this multidisciplinary work blends geopolitics, economics, history, international relations, military doctrine, and political science to provide a better understanding of one of the most vexing problems facing the world.

"In much the same way that Good to Great uncovered hitherto hidden secrets of highly successful companies, Navarro's Always a Winner uses extensive research to reveal the overriding importance of learning how to forecast and strategically manage the business cycle for competitive advantage. In doing so, this book provocatively explores a critical aspect of successful management virtually untapped by the existing strategy literature." —Dan DiMicco, Chairman and Chief Executive Officer, Nucor Steel "

Always a Winner is an important and timely guide to thriving in challenging economic times. Prof. Navarro deftly bridges the academic and business communities, showing corporate leaders how to read economic tea-leaves to anticipate business cycles. His "Master Cyclist" credo offers many practical tips and real-world case studies for steering companies through turbulent economic seas." —Mark Greene, Ph.D, Chief Executive Officer, FICO (Fair Isaac Corp.) "Navarro's Always a Winner shows why forecasting the economy with a ruler can be lethal for corporate executives and money managers. He demonstrates how to skillfully anticipate the ups and downs of the economy and successfully navigate through them. The current economic crisis clearly demonstrates why this book is so important to have on your bookshelf." —Mark Zandi, Chief Economist and Cofounder of Moody's Economy.com "Always a Winner is required reading for every entrepreneur, money manager, and independent investor hoping to

outperform the market and retire one day." "Mark T. Brookshire, Founder of StockTrak.com and WallStreetSurvivor.com " Navarro's wealth of real world examples will show you how to make both economic recessions and recoveries invaluable allies in executing competitive corporate strategies. A must read!" "Lakshman Achuthan, Managing Director, Economic Cycle Research Institute Why recessions are far more dangerous than any 10 competitors Most companies make a lot of money during economic expansions-and lose a lot of money during recessions. That is the way it has always been. That is the way it need not always be. This book will show you how to "always be a winner" over the course of the entire business cycle-not just when economic times are good. To do this job, this book will arm you with all the strategies and tactics and forecasting tools you will need to profitably manage your organization through the business cycle seasons-from the best of boom times to the worst of recessionary times. In this book, you will learn to Forecast movements and key recessionary turning points in the business cycle Implement a set of powerful "battle-tested" strategies over the course of the business cycle Rebuild your organization with a strategic business cycle orientation and thereby make it much more recession-resistant and resilient over the longer term The forecasting tools and management strategies revealed in this book have been developed over the last five years by the author-the world's leading expert on managing the business cycle for competitive advantage. By learning to strategically manage the business cycle, your organization will be able to create a powerful competitive and sustainable advantage over its rivals and thereby find the grail sought by every executive team in the world-superior financial performance. In this way, Always a Winner provides you with the in-depth insight and practical advice you need to help your company survive and thrive in the increasingly risky conditions of the 21st century.

Online Library Death By China Confronting The Dragon A Global Call To Action Peter Navarro

An insider reveals what can—and does—go wrong when companies shift production to China In this entertaining behind-the-scenes account, Paul Midler tells us all that is wrong with our effort to shift manufacturing to China. Now updated and expanded, *Poorly Made in China* reveals industry secrets, including the dangerous practice of quality fade—the deliberate and secret habit of Chinese manufacturers to widen profit margins through the reduction of quality inputs. U.S. importers don't stand a chance, Midler explains, against savvy Chinese suppliers who feel they have little to lose by placing consumer safety at risk for the sake of greater profit. This is a lively and impassioned personal account, a collection of true stories, told by an American who has worked in the country for close to two decades. *Poorly Made in China* touches on a number of issues that affect us all.

The U.S. media and politicians tell us that China is a threat to our very survival, claiming that they take our jobs, pollute the world, repress their own people, and represent all that is opposed to our values and our way of life. However, Terry Wittenmyer takes on the media, the politicians, and the "experts" to show you why China should not be feared. Go on a journey of exploration to learn what's unfolding in China today, and along the way, discover important moments from China's past that influence its present. Look beyond the headlines and into the statistical facts and the untold "rest of the story," to better understand China's rise. With each chapter, you'll be challenged to consider a different path for U.S.-China relations—a path that considers China not as our greatest threat, but as our greatest opportunity. The news headlines warn us of the growing threats from China. We're warned to fear China's military buildup, which "threatens the Pacific region," and their exponential economic growth, which "is accomplished through currency manipulation and unfair trade practices." Each day brings new warnings and more reasons why we should fear China. But do the headlines tell the whole story, and is

Online Library Death By China Confronting The Dragon A Global Call To Action Peter Navarro

that story even accurate? Explore the truth behind the headlines as the reality of China is revealed. Should the U.S. counter China's growing military power? Is China the biggest threat to our cyberspace security? Is Trade with China destroying our economy? Are Chinese products like toys and food dangerous? Is China the most polluted country in the world? Should we refuse to work with China on technology? Is China stealing all that we create by ignoring intellectual property rights? Should the U.S. promote democracy in China? Are human rights in China ignored with the denial of basic freedoms like the right to vote, limits on freedom of speech, and a one-child policy? Is Chinese communism a threat to the West? Is a growing gap between rich and poor setting the stage for a grand revolution in China? Asking the question: Should we fear China?"

China is hot. The world sees a glorious future for this sleeping giant, three times larger than the United States, predicting it will blossom into the world's biggest economy by 2010. According to Chang, however, a Chinese-American lawyer and China specialist, the People's Republic is a paper dragon. Peer beneath the veneer of modernization since Mao's death, and the symptoms of decay are everywhere: Deflation grips the economy, state-owned enterprises are failing, banks are hopelessly insolvent, foreign investment continues to decline, and Communist party corruption eats away at the fabric of society. Beijing's cautious reforms have left the country stuck midway between communism and capitalism, Chang writes. With its impending World Trade Organization membership, for the first time China will be forced to open itself to foreign competition, which will shake the country to its foundations. Economic failure will be followed by government collapse. Covering subjects from party politics to the Falun Gong to the government's insupportable position on Taiwan, Chang presents a thorough and very chilling overview of China's present and not-so-distant future.

Online Library Death By China Confronting The Dragon A Global Call To Action Peter Navarro

Most companies ignore one of their best opportunities for honing competitive advantage: the opportunity to proactively manage business cycles and macroeconomic turbulence. Despite the profound impact that the business cycle has on the fortunes and fate of so many businesses large and small--and the employees and investors that depend on them--not a single book offers a comprehensive guide to strategically and tactically managing the business cycle. The Well-Timed Strategy shows how to manage not just the business cycle and industry cycles but also today's unprecedented level of macroeconomic turbulence. Peter Navarro shows how to align every facet of business strategy, tactics, and operations to reflect changing business conditions. Drawing on hundreds of examples, Navarro distills clear, simple management principles for managing economic upswings and downswings. Navarro addresses everything from inventory, production, and supply chain management to marketing, pricing, and long-term capital investment. Navarro presents examples from around the globe, ranging from Broadcom and Cemex to Paccar and Xilinx Chinese real estate developers to U.S. small caps. Clear, concise, and exceptionally readable, The Well-Timed Strategy makes complex macroeconomic forecasting easy to understand -- and even easier to act upon.

Global financial markets are part of a much larger world, a world of fluid government policies, political unrest, and other unpredictable forces. *If It's Raining in Brazil, Buy Starbucks* quantifies how far-reaching factors affect stock prices, and how investors can trade more effectively by understanding the links between these forces and the stock market. It focuses on specific macroeconomic forces and which sectors of the economy react to different indicators, providing investors and traders with clear signals on whether to buy, sell, or sit on the sidelines. Unlike more targeted investing titles, Peter Navarro's insightful book contains benefits for all investors—from day traders to long-term, buy-and-hold investors. Simulations and analyses, along with real-life examples and case studies, provide inside details on: How to profit from specific technological change Strategies to trade effectively in times of recession or inflation Which economic indicators to follow and why
