"Pure fun! A hilarious rom-com that head-fakes you into tumbling headlong into a techno-zombie survival thriller propelled by banter and plenty of heart."--DAVID YOON, New York Times bestselling author of Frankly in Love Love is a battlefield in this hysterical debut, perfect for fans of Jenny Han. Nate Jae-Woo Kim wants to be rich. When one of his classmates offers Nate a ridiculous amount of money to commit grade fraud, he knows that taking the windfall would help support his prideful Korean family, but is compromising his integrity worth it? Luck comes in the form of Kate Anderson, Nate's colleague at the zombie-themed escape room where he works. She approaches Nate with a plan: a local tech company is hosting a weekend-long survivalist competition with a huge cash prize. It could solve all of Nate's problems, and she needs the money too. If the two of them team up, Nate has a real shot of winning the grand prize. But the real challenge? Making through the weekend with his heart intact... Additional Praise for The Perfect Escape "The Perfect Escape is just that--perfect. Filled with humor and heart, it won't let you go until you're smiling."--Danielle Paige, New York Times bestselling author of the Dorothy Must Die series and Stealing Snow "Effortlessly hilarious and super lovable. I hope this is the YA romcom of 2020."--Helen Hoang, USA Today bestselling author of The Bride Test and The Kiss Quotient "An adorable, laugh-out-loud YA romcom with a lovable hero and an action-packed zombie-themed escape room--what more could you want?"--Jenn Bennett, author of Alex, Approximately

Introduction to Sports Biomechanics has been developed to introduce you to the core topics covered in the first two years of your degree. It will give you a sound grounding in both the theoretical and practical aspects of the subject. Part One covers the anatomical and mechanical foundations of biomechanics and Part Two concentrates on the measuring techniques which sports biomechanists use to study the movements of the sports performer. In addition, the book is highly illustrated with line drawings and photographs which help to reinforce explanations and examples.

"Intellectually deft and lively to read, Skate Life is an important addition to the literature on youth cultures, contemporary masculinity, and the role of media in identity formation." ---Janice A. Radway, Northwestern University, author of Reading the Romance: Women, Patriarchy, and Popular Literature "With her elegant research design and sophisticated array of anthropological and media studies approaches, Emily Chivers Yochim has produced one of the best books about race, gender, and class that I have read in the last ten years. In a moment where celebratory studies of youth, youth subcultures, and their relationship to media abound, this book stands as a brilliantly argued analysis of the limitations of youth subcultures and their ambiguous relationship to mainstream commercial culture." ---Ellen Seiter, University of Southern California "Yochim has made a valuable contribution to media and cultural studies as well as youth and American studies by combining this research and by coining the phrase 'corresponding cultures,' which conceptualizes the complex and dynamic processes skateboarders employ to negotiate their identities as part of both mainstream and counter-cultures." ---JoEllen FisherKeller, New York University Skate Life examines how young male skateboarders use skate culture media in the production of their identities. Emily Chivers Yochim offers a comprehensive ethnographic analysis of an Ann Arbor, Michigan, skateboarding community, situating it within a larger historical examination of skateboarding's portrayal in mainstream media and a critique of mainstream, niche, and locally produced media texts (such as, for example, Jackass, Viva La Bam, and Dogtown and Z-Boys). The book uses these elements to argue that adolescent boys can both critique dominant norms of masculinity and maintain the power that white heterosexual masculinity offers. Additionally, Yochim uses these analyses to introduce the notion of "corresponding cultures," conceptualizing the ways in which media audiences both argue with and incorporate mediated images into their own ideas about identity. In a strong combination of anthropological and media studies approaches, Skate Life asks important questions of the literature on youth and provides new ways of assessing how young people create their identities. Emily Chivers Yochim is Assistant Professor in the Department of Communication Arts, Allegheny College. Cover design by Brian V. Smith

In the past decade, few subjects at the intersection of medicine and sports have generated as much public interest as sports-related concussions - especially among youth. Despite growing awareness of sports-related concussions and campaigns to educate athletes, coaches, physicians, and parents of young athletes about concussion recognition and management, confusion and controversy persist in many areas. Currently, diagnosis is based primarily on the individual rather than on objective diagnostic markers, and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity. Sports-Related Concussions in Youth: Improving the Science, Changing the Culture reviews the science of sports-related concussions in youth from elementary school through young adulthood, as well as in military personnel and their dependents. This report recommends actions that can be taken by a range of audiences - including research funding agencies, legislatures, state and school superintendents and athletic directors, military organizations, and equipment manufacturers, as well as youth who participate in sports and their parents - to improve what is known about concussions and to reduce their occurrence. Sports-Related Concussions in Youth finds that while some studies provide useful information, much remains unknown about the extent of concussions in youth; how to diagnose, manage, and prevent concussions; and the short- and long-term consequences of concussions as well as repetitive head impacts that do not result in concussion symptoms. The culture of sports negatively influences athletes' self-reporting of concussion symptoms and their adherence to return-to-play guidance. Athletes, their teammates, and, in some cases, coaches and parents may not fully appreciate the health threats posed by concussions. Similarly, military recruits are immersed in a culture that includes devotion to duty and service before self, and the critical nature of concussions may often go unheeded. According to Sports-Related Concussions in Youth, if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered, then the culture in which these athletes perform and compete will become much safer. Improving understanding of the extent, causes, effects, and prevention of sports-related concussions is vitally important for the health and well-being of youth athletes. The findings and recommendations in this report set a direction for research to reach this goal.

This book presents all the publicly available questions from the PISA surveys. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.

The author looks at the specifics of oil reserves and the petroleum industry and speculates on what will happen when the well runs dry.

"As valuable for the executive going into her umpteenth interview as for the college grad seeking his first real job." --Richard Jackson, Business Coach, Professional Coaching Network In today's job market, how you perform in an interview can make or break your hiring possibilities. If you want to stand a head above the rest of the pack, 301 Smart Answers to Tough Interview Questions is the definitive guide you need to the real, and sometimes quirky, questions employers are using to weed out candidates. Do you know the best answers to: --It looks like you were fired twice. How did that make you feel? --Do you know who painted this work of art? --What is the best-managed company in America? --If you could be any product in the world, what would you choose? --How many cigars are smoked in a year? --Are you a better visionary or implementer? Why? Leaning on her own years of experience and the experiences of more than 5,000 recent candidates, Vicky Oliver shows you how to finesse your way onto a company's payroll. "Everything I always wanted to know about job interviews but was afraid to be asked." --Claude Chene, Senior Vice President, Head of Business Development, U.K. and Europe, Sanford Bernstein & Co.

Newtonian mechanics : dynamics of a point mass (1001-1108) - Dynamics of a system of point masses (1109-1144) - Dynamics of rigid bodies (1145-1223) - Dynamics of deformable bodies (1224-1272) - Analytical mechanics : Lagrange's equations (2001-2027) - Small oscillations (2028-2067) - Hamilton's canonical equations (2068-2084) - Special relativity (3001-3054).
