cars in the world, particularly in the United States during the 1950s and 1960s. The Works competition cars notched victories at Le Mans, Sebring, the Monte Carlo rally, and many others and inspired privateers to take their cars to the track. Every model came from a bloodline of racing. Triumph historian G. William Krause reviews every model in the sports car lineup. He covers the history, design evolution, and performance specifications from the first sports cars in the 1930s through the final cars built in 1981. Throughout Triumph's history a number of pivotal moments could have significantly changed the company's fortunes. This book also looks at the "what if" cars that never made it into production, including photos. Although they have not been built for more than three decades, their mark on sports car history is undeniable. Whether you're a fan of the spartan brutes of the 1950s or the refined comfort and performance of the last TRs, you will find the backstory of your favorites here. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}
