Meant to aid State & local emergency managers in their efforts to develop & maintain a viable all-hazard emergency operations plan. This guide clarifies the preparedness, response, & short-term recovery planning elements that warrant inclusion in emergency operations plans. It offers the best judgment & recommendations on how to deal with the entire planning process -- from forming a planning team to writing the plan. Specific topics of discussion include: preliminary considerations, the planning process, emergency operations plan format, basic plan content, functional annex content, hazard-unique planning, & linking Federal & State operations.

Comprehensive Preparedness Guide (CPG) 101 provides Federal Emergency Management Agency (FEMA) guidance on the fundamentals of planning and developing emergency operations plans (EOP). CPG 101 shows that EOPs are connected to planning efforts in the areas of prevention, protection, response, recovery, and mitigation. Version 2.0 of this Guide expands on these fundamentals and encourages emergency and homeland security managers to engage the whole community in addressing all risks that might impact their jurisdictions. While CPG 101 maintains its link to previous guidance, it also reflects the reality of the current operational planning environment. This Guide integrates key concepts from national preparedness policies and doctrines, as well as lessons learned from disasters, major incidents, national assessments, and grant programs. CPG 101 provides methods for planners to: Conduct community-based planning that engages the whole community by using a planning process that represents the actual population in the community and involves community leaders and the private sector in the planning process; Ensure plans are developed through an analysis of risk; Identify operational assumptions and resource demands; Prioritize plans and planning efforts to support their seamless transition from development to execution for any threat or hazard; Integrate and synchronize efforts across all levels of government. CPG 101 incorporates the following concepts from operational planning research and day-to-day experience: The process of planning is just as important as the resulting document; Plans are not scripts followed to the letter, but are flexible and adaptable to the actual situation; Effective plans convey the goals and objectives of the intended operation and the actions needed to achieve them. Successful operations occur when organizations know their roles, understand how they fit into the overall plan, and are able to execute the plan. Comprehensive Preparedness Guide (CPG) 101 provides guidelines on developing emergency operations plans (EOP). It promotes a common understanding of the fundamentals of risk-informed planning and decision making to help planners examine a hazard or threat and produce integrated, coordinated, and synchronized plans. The goal of CPG 101 is to make the planning process routine across all phases of emergency management and for all homeland security mission areas. This Guide helps planners at all levels of government in their efforts to develop and maintain viable all-hazards, all-threats EOPs. Accomplished properly, planning provides a methodical way to engage the whole community in thinking through the life cycle of a potential crisis, determining required capabilities, and establishing a framework for roles and responsibilities. It shapes how a community envisions and shares a desired outcome, selects effective ways to achieve it, and communicates expected results. Each jurisdiction's plans must reflect what that community will do to address its specific risks with the unique resources it has or can obtain. Planners achieve unity of purpose through coordination and integration of plans across all levels of government, nongovernmental organizations, the private sector, and individuals and families. This supports the fundamental principle that, in many situations, emergency management and homeland security operations start at the local level and expand to include Federal, state, territorial, tribal, regional, and private sector assets as the affected jurisdiction requires additional resources and capabilities. A shared planning community increases the likelihood of integration and synchronization, makes planning cycles more efficient and effective, and makes plan maintenance easier.

Introduction to Emergency Management, Fifth Edition, offers a fully up-to-date analysis of US emergency management principles. In addition to expanding coverage of risk management in a time of climate change and terrorism, Haddow, Bullock, and Coppola discuss the impact of new emergency management technologies, social media, and an increasing focus on recovery. They examine the effects of the 2012 election results and discuss FEMA's controversial National Flood Insurance Program (NFIP). Introduction to Emergency Management, Fifth Edition, gives instructors and students the best textbook content, instructor-support materials, and online resources to prepare future EM professionals for this demanding career. Introduction to FEMA's Whole Community disaster preparedness initiative Material on recent disaster events, including the Boston Marathon Bombing (2013), Hurricane Sandy (2012), the Joplin Tornado (2011), the Haiti Earthquake (2011), and the Great East Japan Earthquake (2010) New and updated material on the Department of Homeland Security and the ongoing efforts of the emergency management community to manage terrorism hazards Top-of-the-line ancillaries that can be uploaded to Blackboard and other course management systems.

Buy the paperback, get Kindle eBook FREE using MATCHBOOK. go to www.usgovpub.com to learn how Why buy a book you can download for free? We print this book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. We look over each document carefully and replace poor quality images by going back to the original source document. We proof each document to make sure it's all there - including all changes. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these large documents as a service so you don't have to. The books are compact, tightly-bound, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a SDVOSB. www.usgovpub.com

"The objective of this report is to identify and establish a roadmap on how to do that, and lay the groundwork for transforming how this Nation- from every level of government to the private sector to individual citizens and communities - pursues a real and lasting vision of preparedness. To get there will require significant change to the status quo, to include adjustments to policy, structure, and mindset"--P. 2.

Course Overview This course is designed to foster an overall culture of risk management throughout the DHS workforce. While providing awareness of the fundamental concepts of risk management, the course will prepare employees to manage risk at home, in the workplace, and the community and provide them with a foundation for further development in the area of risk management. Course Objectives: Upon completion of this course, you should be able to: -Recognize the value of risk management. -Explain how the fundamental concepts and principles of risk management apply at home, in the workplace, and in the community. -Explain how the DHS Risk Management Cycle utilizes logical reasoning and critical thinking to address risk management problems. -Describe how risk management alternatives are developed and evaluated in order to support better decisions to effectively manage risk. -Explain how and why the management of risk is one of the fundamental strategies adopted by DHS in meeting mission performance expectations. -Describe the characteristics of effective risk communication.

Course Overview This course describes the role, design, and functions of Emergency Operations Centers and their relationships as components of a multi-agency coordination system. The course contains disaster-related examples, activities and case studies that relate to EOC's and multi-agency coordination systems at the local, state and federal levels of government. Course Objectives: At the end of the course, students should be able to: *Relate EOC operations to National Incident Management System (NIMS) requirements. *Describe the role that EOCs play in overall multiagency coordination. *Describe the relationship between the EOC and the on-scene Incident Command System (ICS) structure. *Identify staffing, information, systems, and equipment needs at the EOC. *Determine whether participants' EOC organizations are conducive to effective coordination. *Identify potential alternate locations suitable for EOC operations should the primary EOC facility become damaged or inoperable. *Create a test, training and exercise plan for critical EOC operations. *Develop a strategy and schedule for reviewing EOC resource requirements and technology needs.

Instructor Guide for the FEMA course to become a CERT team member. It contains the same information as the pdf which can be downloaded from FEMA.gov at no cost. This book contains additional helpful tabs and pages for notes.
