God's Undertaker: Has Science Buried God? - Kindle edition ...

Some commentators claim that science has finally killed the concept of God by virtue of its own all-encompassing explanations of reality. Atheism, they say, is the only intellectually tenable position, and any attempt to reintroduce God is likely to impede scientific progress. In this stimulating and thought-provoking book, with impeccable logic, irrefutable documentation, and extraordinary ...

God's Undertaker: Has Science Buried God? - John C. Lennox ...

Lennox begins *God's Undertaker* by making a critical distinction between science and materialist/naturalist philosophy that, in and of itself, provides a resounding response in the negative to the question posed in the book's subtitle (*Has science buried God?*). Lennox explains that science in an uncontaminated form seeks exclusively to explore the universe by examining its physical properties and apparent laws without making claims about what might or might not exist beyond its own domain.

God's Undertaker: Has Science Buried God?: Lennox, John ...

There have been a number of books published in an attempt to answer this question. Many of them are quite good, but certainly among the two or three best is a new lay level book by Dr. John C. Lennox entitled *God's Undertaker: Has Science Buried God?* Dr. Lennox has earned doctorates from Oxford, Cambridge, and the University of Wales. He is presently professor of mathematics at the University of Oxford and fellow in mathematics and philosophy of science at Green Templeton College, Oxford.

Has Science Buried God? - The Aquila Report

He is particularly interested in the interface of Science, Philosophy and Theology. Lennox has been part of numerous public debates defending the Christian faith. He debated Richard Dawkins on "The God Delusion" in the University of Alabama (2007) and on "Has Science buried God?" in the Oxford Museum of Natural History (2008).

Looks at the relationship between science and religion, and argues that theism may fit science better than atheism.

Evaluates the evidence of modern science in relation to the debate between the atheistic and theistic interpretations of the universe, and provides a fresh basis for discussion. The book has grown out of the author's lengthy experience of lecturing and debating on this subject in the UK, USA, Germany and Russia, and has been written in response to endless requests for the argumentation in written form.

The Grand Design, by eminent scientist Stephen Hawking, is the latest blockbusting contribution to the so-called New Atheist debate, and claims that the laws of physics

Get Free Gods Undertaker Has Science Buried God John C Lennox

themselves brought the Universe into being, rather than God. In this swift and forthright reply, John Lennox, Oxford mathematician and author of *God's Undertaker*, exposes the flaws in Hawking's logic. In lively, layman's terms, Lennox guides us through the key points in Hawking's arguments - with clear explanations of the latest scientific and philosophical methods and theories - and demonstrates that far from disproving a Creator God, they make his existence seem all the more probable.

Atheism is on the march in the western world, and its enemy is God. Religion, the "New Atheists" claim, "is dangerous", it "kills" or "poisons everything". And if religion is the problem with the world, their answer is simple: get rid of it. But are things really so straightforward? Tackling the likes of Richard Dawkins, Stephen Hawking, Christopher Hitchens, and Daniel Dennett head on, John Lennox highlights the fallacies in their approach, arguing that their irrational and unscientific methodology leaves them guilty of the same obstinate foolishness of which they accuse dogmatic religious folks. Erudite and wide-ranging, *Gunning for God* packs some debilitating punches. It also puts forward new ideas about the nature of God and Christianity that will give the New Atheists' best friends and worst enemies alike some stimulating food for thought.

What did the writer of Genesis mean by "the first day"? Is it a literal week or a series of time periods? If I believe that the earth is 4.5 billion years old, am I denying the authority of Scripture? In response to the continuing controversy over the interpretation of the creation narrative in Genesis, John Lennox proposes a succinct method of reading and interpreting the

Get Free Gods Undertaker Has Science Buried God John C Lennox

first chapters of Genesis without discounting either science or Scripture. With examples from history, a brief but thorough exploration of the major interpretations, and a look into the particular significance of the creation of human beings, Lennox suggests that Christians can heed modern scientific knowledge while staying faithful to the biblical narrative. He moves beyond a simple response to the controversy, insisting that Genesis teaches us far more about the God of Jesus Christ and about God's intention for creation than it does about the age of the earth. With this book, Lennox offers a careful yet accessible introduction to a scientifically-savvy, theologically-astute, and Scripturally faithful interpretation of Genesis.

This book evaluates the evidence of modern science in relation to the debate between the atheistic and theistic interpretations of the universe, and provides a fresh basis for discussion. The book has grown out of the author's lengthy experience of lecturing and debating on this subject in the UK, USA, Germany and Russia, and has been written in response to endless requests for the argumentation in written form. - Publisher.

Daniel's story is one of extraordinary faith in God lived out at the pinnacle of executive power. It tells of four teenage friends, born in the tiny state of Judah about twenty-six centuries ago, but captured by Nebuchadnezzar, emperor of Babylon. Daniel describes how they eventually rose to the top echelons of administration. Daniel and his friends did not simply maintain their private devotion to God; they maintained a high-profile witness in a pluralistic society antagonistic to their faith. That is why their story has such a powerful message for us. Society tolerates the practice of Christianity in private and in church services, but it increasingly

Get Free Gods Undertaker Has Science Buried God John C Lennox

deprecates public witness. If Daniel and his compatriots were with us today they would be in the vanguard of the public debate. What was it that gave that ancient foursome, Daniel and his three friends, the strength and conviction to be prepared, often at great risk, to swim against the flow?

You don't have to be a computer scientist to get involved in the discussion about where artificial intelligence and technology are going. What will the year 2084 hold for you--for your friends, for your family, and for our society? Are we doomed to the grim dystopia imagined in George Orwell's 1984? In 2084, scientist and philosopher John Lennox will introduce you to a kaleidoscope of ideas: the key developments in technological enhancement, bioengineering, and, in particular, artificial intelligence. You will discover the current capacity of AI, its advantages and disadvantages, the facts and the fiction, as well as potential future implications. The questions posed by AI are open to all of us. And they demand answers. A book that is written to challenge all readers, no matter your worldview, 2084 shows how the Christian worldview, properly understood, can provide evidence-based, credible answers that will bring you real hope for the future of humanity.

How belief in a loving and sovereign God helps us to make sense of and cope with the coronavirus outbreak. We are living through a unique, era-defining period. Many of our old certainties have gone, whatever our view of the world and whatever our beliefs. The coronavirus pandemic and its effects are perplexing and unsettling for all of us. How do we begin to think it through and cope with it? In this short yet profound book, Oxford mathematics
