It's an awful story. It's an awful story. Why do you want to bring this up now?--Chief Awusa of Atorkor For centuries, the story of the Atlantic slave trade has been filtered through the eyes and records of white Europeans. In this watershed book, historian Anne C. Bailey focuses on memories of the trade from the African perspective. African chiefs and other elders in an area of southeastern Ghana-once famously called "the Old Slave Coast"-share stories that reveal that Africans were traders as well as victims of the trade. Bailey argues

that, like victims of trauma, many African societies now experience a fragmented view of their past that partially explains the blanket of silence and shame around the slave trade. Capturing scores of oral histories that were handed down through generations, Bailey finds that, although Africans were not equal partners with Europeans, even their partial involvement in the slave trade had devastating consequences on their history and identity. In this unprecedented and revelatory book, Bailey explores the delicate and fragmented nature of historical memory. From the Trade Paperback edition.

The transatlantic slave trade forced millions of Africans into bondage. Until the early nineteenth century, African slaves came to the Americas in greater numbers than Europeans. In the Shadow of Slavery provides a startling new assessment of the Atlantic slave trade and upends conventional wisdom by shifting attention from the crops slaves were forced to produce to the foods they planted for their own nourishment. Many familiar foods—millet, sorghum, coffee, okra, watermelon, and the "Asian" long bean, for example—are native to Africa, while commercial products such as Coca Cola, Worcestershire Sauce, and Palmolive Soap rely on African plants that were brought to the Americas on slave ships as provisions, medicines, cordage, and bedding. In this exciting, original, and groundbreaking

book, Judith A. Carney and Richard Nicholas Rosomoff draw on archaeological records, oral histories, and the accounts of slave ship captains to show how slaves' food plots—"botanical gardens of the dispossessed"—became the incubators of African survival in the Americas and Africanized the foodways of plantation societies.

In the mid 1700s, around the age of eleven, Olaudah Equiano and his sister were kidnapped from their village in equatorial Africa and sold to slavers. Within a year he was aboard a European slave ship on his way to the Caribbean. The Interesting Narrative of the Life of Olaudah Equiano, or Gustavus Vassa, the African was published by the author in 1789 and is part adventure story, part treatise on the corrupting power of slavery, and part tract about the transformative powers of Christianity. Equiano's story takes him from Africa to the Americas, back across the Atlantic to England, into the Mediterranean, and even north to the ice packs, on a mission to discover the North-East passage. He fights the French in the Seven Year's War, is a mate and merchant in the West Indies, and eventually becomes a freedman based in London. The Interesting Narrative of the Life of Olaudah Equiano was one of the first popular slave narratives and was reprinted eight times in the author's lifetime. While modern scholars value this account as an important source on the life of the

Atlantic slave societies were notorious deathtraps. In *Surviving Slavery in the British Caribbean*, Randy M. Browne looks past the familiar numbers of life and death and into a human drama in which enslaved Africans and their descendants struggled to survive against their enslavers, their environment, and sometimes one another. Grounded in the nineteenth-century British colony of Berbice, one of the Atlantic world's best-documented slave societies and the last frontier of slavery in the British Caribbean, Browne argues that the central problem for most enslaved people was not how to resist or escape slavery but simply how to stay alive. Guided by the voices of hundreds of enslaved people preserved in an extraordinary set of

legal records, Browne reveals a world of Caribbean slavery that is both brutal and breathtakingly intimate. Field laborers invoked abolitionist-inspired legal reforms to protest brutal floggings, spiritual healers conducted secretive nighttime rituals, anxious drivers weighed the competing pressures of managers and the condition of their fellow slaves in the fields, and women fought back against abusive masters and husbands. Browne shows that at the core of enslaved people's complicated relationships with their enslavers and one another was the struggle to live in a world of death. Provocative and unflinching, *Surviving Slavery in the British Caribbean* reorients the study of Atlantic slavery by revealing how differently enslaved people's social relationships, cultural practices, and political strategies appear when seen in the light of their unrelenting struggle to survive.

Much is known about Britain's role in the Atlantic slave trade during the eighteenth century but few are aware of the sustained campaign against slaving conducted by the Royal Navy after the passing of the Slave Trade Abolition Act of 1807. Peter Grindal provides the definitive account of this little known yet important part of the British, European and American history. Drawing on original sources to provide a comprehensive and engaging narrative of the naval

operations against slavers of all nations - in particular Portugal, Spain, the Netherlands and Brazil, he describes how illegal traders sought to evade treaty obligations, reveals the obduracy of the USA that prolonged the slave trade, and shows how, despite inadequate resources, the Royal navy's sixty-year campaign forced slavers to expend ever greater sums to conduct their business and confront the losses inflicted by capture and condemnation. A work that will transform our understanding of the Royal Navy's campaign against the Atlantic slave trade.

Thirty-seven essays providing a comprehensive overview, covering the most essential aspects of Atlantic history from c.1450 to c.1850, offering a wide-ranging and authoritative account of the movement of people, plants, pathogens, products, and cultural practices--to mention some of the key agents--around and within the Atlantic basin.

A series of transformations, reforms, and attempted abolitions of slavery form a core narrative of nineteenth-century coastal West Africa. As the region's role in Atlantic commercial networks underwent a gradual transition from principally that of slave exporter to producer of "legitimate goods" and dependent markets, institutions of slavery became battlegrounds in which European

abolitionism, pragmatic colonialism, and indigenous agency clashed. In *Slavery and Reform in West Africa*, Trevor Getz demonstrates that it was largely on the anvil of this issue that French and British policy in West Africa was forged. With distant metropolises unable to intervene in daily affairs, local European administrators, striving to balance abolitionist pressures against the resistance of politically and economically powerful local slave owners, sought ways to satisfy the latter while placating or duping the former. The result was an alliance between colonial officials, company agents, and slave-owning elites that effectively slowed, sidetracked, or undermined serious attempts to reform slave holding. Although slavery was outlawed in both regions, in only a few isolated instances did large-scale emancipations occur. Under the surface, however, slaves used the threat of self-liberation to reach accommodations that transformed the master-slave relationship. By comparing the strategies of colonial administrators, slave-owners, and slaves across these two regions and throughout the nineteenth century, *Slavery and Reform in West Africa* reveals not only the causes of the astounding success of slave owners, but also the factors that could, and in some cases did, lead to slave liberations. These findings have serious implications for the wider study of slavery and emancipation and for the history of Africa generally.
