To make any old cup of coffee, you simply need a pot, heat, ground coffee, and water. But you're not just anyone. You are a coffee aficionado, a determined, fearless seeker of the best java. And this is the guide for you. How to Make Coffee provides an in-depth look at the art and science behind the bean. Learn the anatomy of coffee; the chemistry of caffeine; the best way to roast, grind, and brew the beans to their peak flavor; and what gadgets you really need (versus what gadgets are for mere coffee dilettantes). With illustrated, step-by-step instructions, How to Make Coffee is for the person who doesn't want to settle for anything less than the perfect cup.

How to Make Coffee explores the scientific principles behind the art of coffee making, along with step-by-step instructions of all the major methods, and which beans, roast, and grind are best for them. This book also covers topics such as: The history of the bean Chemical composition Caffeine and decaf Milk Roasting and grinding Machines and gadgets . . . and many more Caffeine is the most widely consumed mind-altering molecule in the world; we cannot get enough of it. How is it that coffee has such a hold? Its all in the chemistry; the molecular structure of caffeine and the flavour-making phenols and fats that can be lured out from the bean by roasting, grinding and brewing. Making good coffee depends on understanding the science: why water has to be at a certain temperature, how roast affects taste, and what happens when you add cream. This book lays out the scientific principles for the coffee-loving non-scientist; stick to these and you will never drink an ordinary cup of joe again.
