and primary health care. Based on the 'Social Model of Health', An Introduction to Community and Primary Health Care explores how social and environmental factors impact healthcare in Australian communities. It discusses the principles of health and mental health promotion, the importance of cultural competence and the practice of community needs assessment. The book is divided into three parts - theory, skills and health professionals in practice. This latter section is unique to this book and encourages students to consider how various nursing roles address issues of social justice,

nurse. Based on principles of primary health care, it outlines the theory, knowledge and skills required to make a difference to the health and wellbeing of individuals, families, groups, and even whole communities. The contributors make a point of articulating knowledge that is often taken for granted among experienced practitioners. Community Nursing Practice is based on the premise that community nursing is a specialist field of nursing practice in its own right, and nurses require a specific body of knowledge to work effectively in a community setting - no matter what their clinical focus or location.

Contributors outline the foundations of community practice, including principles of disease prevention and wellness promotion, as well as a social model of health. Together with the skills required for work with different population groups, the contribution of research is explored. Professional skills including program management, advocacy, teamwork, home visiting and self management are also covered. With contributions from leading nurse educators and researchers, Community Nursing Practice is richly illustrated with case studies and examples from a variety of practice settings. It is an
