Having endeavoured to remove one species of ill-founded jealousy, which is so prevalent among commercial nations, it may not be amiss to mention another, which seems equally groundless. Nothing is more usual, among states which have made some advances in commerce, than to look on the progress of their neighbours

"The author focuses on Adam Smith and his contemporaries, who pondered these issues, particularly the nature and development of commercial society. They attempted to come to terms with the claim that, on the one hand, the market was a decisive element in economic progress, and, on the other, that its workings depended upon the release of the immoral desires of fallen men and that its consequences were socially and politically destabilizing. Hont reconstructs the salient features of this controversy between the proponents of market sociability and its most trenchant critics. In doing so, he has helped to locate historically the most important arguments at the heart of the emergence of modernity."--Jacket.

Jealousy Of Trade

When István Hont died in 2013, the world lost a giant of intellectual history. A leader of the Cambridge School of Political Thought, Hont argued passionately for a global-historical approach to political ideas. To better understand the development of liberalism, he looked not only to the works of great thinkers but also to their reception and use amid revolution and interstate competition. His innovative program of study culminated in the landmark 2005 book *Jealousy of Trade*, which explores the birth of economic nationalism and other social effects of expanding eighteenth-century markets. *Markets, Morals, Politics* brings together a celebrated cast of Hont's contemporaries to assess his influence, ideas, and methods. Richard Tuck, John Pocock, John Dunn, Raymond Geuss, Gareth Stedman Jones,

Michael Sonenscher, John Robertson, Keith Tribe, Pasquale Pasquino, and Peter N. Miller contribute original essays on themes Hont treated with penetrating insight: the politics of commerce, debt, and luxury; the morality of markets; and economic limits on state power. The authors delve into questions about the relationship between states and markets, politics and economics, through examinations of key Enlightenment and pre-Enlightenment figures in context—Hobbes, Rousseau, Spinoza, and many others. The contributors also add depth to Hont ' s lifelong, if sometimes veiled, engagement with Marx. The result is a work of interpretation that does justice to Hont ' s influence while developing its own provocative and illuminating arguments. *Markets, Morals, Politics* will be a valuable companion to readers of Hont and anyone concerned with political

competition prevailed in a fierce controversy over international trade. This groundbreaking study is the first to examine this 'protectionist turn' in full. Faced with a reaffirmation of mercantile jealousy under the Bourbon Restoration, Benjamin Constant, Jean-Baptiste Say and regional publicists advocated the adoption of the liberty of commerce in order to consolidate the new liberal order. But after the Revolution of 1830 a new generation of liberal thinkers endeavoured to reconcile the jealousy of trade with the discourse of commercial society and political liberty. New justifications for protection oscillated between an industrialist reinvention of jealousy and an aspiration to self-sufficiency as a means of attenuating the rise of urban pauperism. A strident denunciation of British power and social imbalances served to defuse the internal tensions of the protectionist

discourse and facilitated its dissemination across the French political spectrum.

Originally published in 1955, Eugene Rotwein's collection of David Hume's economic writings has become the criterion by which to measure studies of Hume's thinking on economics. Rotwein, in his extended introduction, masterfully examines the connection between Hume's various writings—economic, political, philosophical, and historical. This edition is graced with a new introduction by Margaret Schabas. Hume belonged to the same generation as that of his friend and fellow countryman Adam Smith. Hume's writings on economics, however, unlike those of Smith's, comprise a relatively small portion of his published works. They consist of nine of twelve essays in his *Political Discourses*, first published in 1752, and a rather small number of

passages in Hume's private letters to such correspondents as Smith, Montesquieu, Turgot, and Oswald. They were all brought together here for the first time in a single volume. These writings sought to clarify the various problems of Hume's society and suggest remedies for their solution. They are still relevant for the modern reader. Included are "Of Commerce," "Of Refinement in the Arts," "Of Money," "Of Interest," "Of the Balance of Trade," "Of the Jealousy of Trade," "Of Taxes," "Of Public Credit," and "Of the Populousness of Ancient Nations," as well as the relevant extracts from Hume's letters. Long unavailable, this edition will be welcomed by students of economics, philosophy, and the Scottish Enlightenment.

and envy have emerged as legitimate topics of scientific inquiry. This volume includes chapters from nearly every major contributor to the psychological literature in this area. From emotional, and cognitive processes that underlie jealousy and envy; to the ways these emotions are experienced and expressed within close relationships; to family, societal, and cultural contexts, the volume offers a definitive statement of current theory and research.

A ground-breaking account of British and French efforts to channel their eighteenth-century geopolitical rivalry into peaceful commercial competition Britain and France waged war eight times in the century following the Glorious Revolution, a mutual antagonism long regarded as a “ Second Hundred Years ’ War. ” Yet officials on both sides also initiated

ententes, free trade schemes, and colonial bargains intended to avert future conflict. What drove this quest for a more peaceful order? In this highly original account, John Shovlin reveals the extent to which Britain and France sought to divert their rivalry away from war and into commercial competition. The two powers worked to end future conflict over trade in Spanish America, the Caribbean, and India, and imagined forms of empire-building that would be more collaborative than competitive. They negotiated to cut cross-channel tariffs, recognizing that free trade could foster national power while muting enmity. This account shows that eighteenth-century capitalism drove not only repeated wars and overseas imperialism but spurred political leaders to strive for global stability.
