Recently vilified as the prime dynamic driving home the breach between poor and rich nations, here the branding process is rehabilitated as a potential saviour of the economically underprivileged. Brand New Justice, now in a revised paperback edition, systematically analyses the success stories of the Top

Thirteen nations, demonstrating that their wealth is based on the 'last mile' of the commercial process: buying raw materials and manufacturing cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he demonstrates the very real possibility of enlightened capitalism working as a force for good in global terms.

SELECTED AS A 2008 BEST BUSINESS BOOK OF THE YEAR BY THE ECONOMIST "ONE OF THE SMARTEST INVESTORS ON THE PLANET."--MONEY MAGAZINE "This book is an essential read for those who wish to understand the modern world of investing." --Alan Greenspan Winner of the 2008 Financial Times and Goldman Sachs Business Book of the Year Award When Markets Collide is a timely alert to the fundamental changes taking place in today's global economic and financial systems--and a call to action for investors who may fall victim to misinterpreting important signals. While some have tended to view asset class mispricings as mere "noise," this compelling book shows why they are important signals of opportunities and risks that will shape the market for years to come. One of today's most respected names in finance, Mohamed El-Erian puts recent events in their proper context, giving you the tools that can help you interpret the markets, benefit from global economic change, and navigate the risks. The world economy is in the midst of a series of hand-offs. Global growth is now being heavily influenced by nations that previously had little or no systemic influence. Former debtor nations are building unforeseen wealth and, thus, enjoying unprecedented influence and facing unusual challenges. And new derivative products have changed the behavior of many market segments and players. Yet, despite all these changes, the system's infrastructure is yet to be upgraded to reflect the realities of today's and tomorrow's world. El-Erian investigates the underlying drivers of global change to shed light on how you should: Think about the new opportunities and risks Construct an appropriately diversified and internationalized portfolio Protect your portfolio against new sources of systemic risk Best think about the impact of central banks and financial policies around the world Offering up predictions of future developments, El-Erian directs his focus to help you capitalize on the new financial landscape, while limiting exposure to new risk configurations. When Markets Collide is a unique collection of books for investors and policy makers around the world. In addition to providing a thorough analysis and clear perspective of recent events, it lays down a detailed map for navigating your way through an otherwise perplexing new economic landscape.
