As unique as a fingerprint, our handwriting is a reflection of our inner selves, revealing everything from our talents and personal tastes to insecurities, desires, and psychological attitudes. Reed Hayes shows how the practical art of graphology (or handwriting analysis) can provide insight into the qualities of your own personality as well as the personalities of those around you. *Between the Lines* provides an awareness of graphology that not only enhances our understanding of ourselves, but also sheds light on our business, social, and romantic relationships.

If you find yourself called on to judge people on a regular basis, you need all the tools at your disposal to do your job right. Handwriting psychology offers one practical method for helping you learn what you need to learn about your subject quickly. Whether you are a teacher, psychologist or manager, you can benefit from the guidance of Dr. Helmut Ploog, a handwriting expert. Learn what the size and width of handwriting can reveal about a person, as well as what more muted features—such as slant, spacing, and direction of lines—can make clear. Written in plain English, this guidebook presents pithy explanations of handwriting movements, which may be angular or round, long or short, heavy or light, high or deep below the base line. It also offers analyses of the handwriting of many well-known people, including Charles Darwin, Anne Frank, Paul Getty, Allen Ginsberg, Ernest Hemingway, Frida Kahlo, Somerset Maugham, Pablo Picasso, Pope Benedict, Vladimir Putin, Maurice Ravel, Carl Rogers, and Susan Sontag. Handwriting Psychology should never be used by itself to judge someone, but it can serve as an essential tool to make and confirm observations that could change your life, your career, and your approach to life.
