The definitive guide for using CPM in construction planning and scheduling—now thoroughly updated to reflect new technologies and procedures Critical path method (CPM) is the most widely taught and used framework for construction project design, scheduling, and management. This new edition has been fully revised to cover the latest techniques, standards, and software tools. The book begins by describing the evolution of CPM and goes on to explain every technique and function in complete detail. Written by a pair of experienced engineers and authors, CPM in Construction Management is designed so that you will save time, cut costs, reduce claims, and stay on top of every aspect of complicated projects. Central to the book is the "John Doe" case study, which describes CPM network techniques and illustrates functions such as updating, cost control, resource planning, and delay evaluation. All-new guidelines are provided for multiple software platforms, including Oracle, Deltek, Microsoft, Trimble Vico and Synchro. Includes a full license to Deltek Open Plan CPM software Fully explains how to implement scheduling software products Companion website offers bonus illustrations, detailed software information, and more

Overview: Blending scholarship and imaginative writing, ASU business professor Kinicki (of Kreitner/Kinicki Organizational Behavior 9e) and writer Williams (of Williams/Sawyer Using Information Technology 7e and other college texts) have created a highly readable introductory management text with a truly unique student-centered layout that has been well received by today's visually oriented students. The authors present all basic management concepts and principles in "bite-size" chunks, 2- to 6-page sections, to optimize student learning and also emphasize the practicality of the subject matter. In addition, instructor and students are given supported by a wealth of classroom-tested resources.
