"Hart combines powerful insights into human nature and pristine prose with history and archeology in her stellar fourth crime novel" (Publishers Weekly) about an ancient volume of philosophical heresy that provides a motive for murder. After a year away from working in the field, archaeologist Cormac Maguire and pathologist Nora Gavin are back in the bogs, investigating a ninth-century body found buried in the trunk of a car. They discover that the ancient corpse is not alone—pinned beneath it is the body of Benedict Kavanagh, missing for mere months and familiar to television viewers as a philosopher who enjoyed destroying his opponents in debate. Both men were viciously murdered, but centuries apart—so how did they end up buried together in the bog? While on the case, Cormac and Nora lodge at Killowen, a nearby artists' colony, organic farm, and sanctuary for eccentric souls. Digging deeper into the older crime, they become entangled in high-stakes intrigue encompassing Kavanagh's death while surrounded by suspects in his ghastly murder. It seems that everyone at Killowen has some secret to protect. Set in modern-day Ireland, The Book of Killowen reveals a new twist on the power of language—and on the eternal mysteries of good and evil.

Two political titans forge a modern city and a vibrant public sector in this history of strong leadership at a time of national crisis. City of Ambition is a brilliant history of the New Deal and its role in the making of modern New York City. The story of a remarkable collaboration between Franklin Roosevelt and Fiorello La Guardia, this is a case study in creative political leadership in the midst of a devastating depression. Roosevelt and La Guardia were an odd couple: patrician president and immigrant mayor, fireside chat and tabloid cartoon, pragmatic Democrat and reform Republican. But together, as leaders of America's two largest governments in the depths of the Great Depression, they fashioned a route to recovery for the nation and the master plan for a great city. Roosevelt and his "Brain Trust"—shrewd, energetic advisors such as Harold Ickes and Harry Hopkins—sought to fight the Depression by channeling federal resources through America's cities and counties. La Guardia had replaced Tammany Hall cronies with policy experts, such as the imperious Robert Moses, who were committed to a strong public sector. The two leaders worked closely together. La Guardia had a direct line of communication with FDR and his staff, often visiting Washington carrying piles of blueprints. Roosevelt relied on the mayor as his link to the nation's cities and their needs. The combination was potent. La Guardia's Gotham became a laboratory for New Deal reform. Roosevelt's New Deal transformed city initiatives into major programs such as the Works Progress Administration, which changed the physical face of the United States. Together they built parks, bridges, and schools; put the unemployed to work; and strengthened the Progressive vision of government as serving the public purpose. Today everyone knows the FDR Drive as a main route to La Guardia Airport. The intersection of steel and concrete speaks to a pair of dynamic leaders whose collaboration lifted a city and a nation. Here is their story.

The new edition of this highly-regarded book includes comprehensive discussion of the nature of an affair and the five types of affairs and their underlying dynamics. The author addresses issues regarding revealing the affair, management of the consequences, rebuilding, and treating an unmarried third party, as well as the host of complex issues regarding children and custody arrangements. New material for the second edition includes cybersex and the effects of new technology on fidelity in marriage; the effects of managed care on treatment; marriage to the third party; and a new chapter on affairs and violence.

This volume contains the proceedings of the workshop on Optimization Theory and Related Topics, held in memory of Dan Butnariu, from January 11-14, 2010, in Haifa, Israel. An active researcher in various fields of applied mathematics, Butnariu published over 80 papers. His extensive bibliography is included in this volume. The articles in this volume cover many different areas of Optimization Theory and its applications: maximal monotone operators, sensitivity estimates via Lyapunov functions, inverse Newton transforms, infinite-horizon Pontryagin principles, singular optimal control problems with state delays, descent methods for mixed variational inequalities, games on MV-algebras, ergodic convergence in subgradient optimization, applications to economics and technology planning, the exact penalty property in constrained optimization, nonsmooth inverse problems, Bregman distances, retraction methods in Banach spaces, and iterative methods for solving equilibrium problems. This volume will be of interest to both graduate students and research mathematicians.

This book offers solutions to anyone who has felt victimized, ostracized or left behind by life. Surprising as it may sound, many people take comfort in their own misery. Feeling too good for too long (or even feeling good at all) can be scary for people, explains Anne Katherine. "Achievement creates anxiety. Intimacy leads to fear. Happiness produces uneasiness. Pleasure causes pain. The solution to this dilemma: what feels good has to be stopped. I call this an addiction to misery." Katherine's fascination and perspective book provides immediate assistance to those people who think they might be making choices that keep them at a "carefully calibrated level of existence--beneath bliss and above despair."
