Exploring Social Psychology succinctly explores social psychological science and applies it to contemporary issues and everyday life. Based on the bestselling text, Social Psychology by David Myers and Jean Twenge, the book presents 31 short modules—each readable in a single sitting—that introduce students to such scientific explorations as love and hate, conformity and independence, prejudice and helping, and persuasion and self-determination. The Connect course for this offering includes SmartBook, an adaptive reading and study experience which guides students to master, recall, and apply key concepts while providing automatically-graded assessments. McGraw-Hill Connect® is a subscription-based learning service accessible online through your personal computer or tablet. Choose this option if your instructor will require Connect to be used in the course. Your subscription to Connect includes the following: • SmartBook® - an adaptive digital version of the course textbook that personalizes your reading experience based on how well you are learning the content. • Access to your instructor's homework assignments, quizzes, syllabus, notes, reminders, and other important files for the course. • Progress dashboards that quickly show how you are performing on your assignments and tips for improvement. • The option to purchase (for a small fee) a print version of the book. This binder-ready, loose-leaf version includes free shipping. Complete system requirements to use Connect can be found here: <http://www.mheducation.com/highered/platforms/connect/training-support-students.html>

An introduction to psychology course. The author's updating and integrated use of the SQ3R learning system (Survey, Question, Read, Rehearse, Review) help to make the text accessible. A comprehensive supplements package is available to help both students and instructors.

Always on top of the latest news in psychology, always tuned in to what's happening in the classroom, David Myers' Exploring Psychology is far and away the best-selling brief introduction to psychology. Thoroughly reexamined page by page, line by line, and reference by reference, each new edition is both refreshingly innovative and reassuringly Myers. The new Seventh Edition is both classic Myers and cutting-edge psychology, a rich presentation of ideas and applications featuring hundreds of new research citations, over 40% new photos, and state-of-the-art media and supplements. But its most compelling feature remains the inimitable Myers' voice—a voice that speaks directly to the curiosities and experiences of all kinds of students. Myers' writing keeps students reading...and learning.

Why Myers? David Myers has become the world's best-selling introductory psychology author by serving the needs of instructors and students so well. Each Myers textbook offers an impeccable combination of up-to-date research, well-crafted pedagogy, and effective media and supplements. Most of all, each Myers text demonstrates why this author's style works so well for students, with his signature compassionate, companionable voice, and superb judgment about how to communicate the science of psychology and its human impact. Why Modules? This modules-based version of Myers' best-selling, full-length text, Psychology (breaking down that book's 16 chapters into 59 short modules) is yet another example of the author's ability to understand what works in the classroom. It comes from Myers' experiences with students who strongly prefer textbooks divided into briefer segments instead of lengthier chapters, and with instructors who appreciate the flexibility offered by the modular format. Modular organization presents material in smaller segments. Students can easily read any module in a single sitting. Self-standing modules. Instructors can assign modules in their own preferred order. The modules make no assumptions about what students have previously read. Illustrations and key terms are repeated as needed. This modular organization of short, stand-alone text units enhances teacher flexibility. Instead of assigning the entire Sensation and Perception chapter, instructors can assign the module on vision, the module on hearing, and/or the module on the other senses in whatever order they choose.
