When the Range Rover Sport was launched in 2005, it was aimed at a new group of customers who in many cases would never have considered a Land Rover product before. These customers wanted and could afford a luxurious vehicle that was expensive to run; but they also wanted a very personalized vehicle that did not have the rather grand and conservative connotations of the full-size Range Rover. Brasher and more glamorous than its older sibling, the Sport was soon adopted by celebrities and others who expected to be noticed. Range Rover Sport - The Complete Story is the first book devoted specifically to the first-generation Range Rover Sport. It tells the story behind the development and launch of the vehicle; it explains the market reaction, including contemporary press reviews; provides details of each model with technical specification tables and colour and trip options; lists production figures and VIN identification and dating; details prices and sales figures for the UK, USA and Canada and finally, includes a useful chapter on buying and owning.

Detailed guidance to assembly, maintenance, etc. of all components. Includes five main bearing engine supplement.

A man with humble beginnings on the family farm, minimal formal education and no qualifications, but an enormous drive and vision. Along with a very smart, loyal and patient wife! He founded one of the most successful automotive small businesses in Australia, was the initiator of trends, creator some of the most radical, yet immaculately engineered cars this country (and all others) have seen and inspired thousands to modify their own cars. Often found observing and listening to reactions from a distance with what many misconstrue as a grumpy, dour look on his face, he prefers to let his cars do the talking, and boy do they do get people talking! Following is the story of a name well recognised in the Australian automotive landscape, but a person who very few actually really know.
