However, the reason for our wholesale retreat from social involvement is not, I don't believe, that most of us feel all is well with the world. At this critical historical time , Paul Loeb's completely revised edition--and inspiring message--is more urgently important than ever.

In *The Impossible Will Take a Little While*, a phrase borrowed from Billie Holliday, the editor of *Soul of a Citizen* brings together fifty stories and essays that range across nations, eras, wars, and political movements. Danusha Goska, an Indiana activist with a paralyzing physical disability, writes about overcoming political immobilization, drawing on her history with the Peace Corps and Mother Teresa. Vaclav Havel, the former president of the Czech Republic, finds value in seemingly doomed or futile actions taken by oppressed peoples. Rosemarie Freeney Harding recalls the music that sustained the civil rights movement, and Paxus Calta-Star recounts the powerful vignette of an 18-year-old who launched the overthrow of Bulgaria's dictatorship. Many of the essays are new, others classic works that continue to inspire. Together, these writers explore a path of heartfelt community involvement that leads beyond despair to compassion and hope. The voices collected in *The Impossible Will Take a Little While* will help keep us all working for a better world despite the obstacles.

Challenging prevailing media stereotypes, *Generation at the Crossroads* explores the beliefs and choices of the students who came of age in the 1980s and 1990s. For seven years, at over a hundred campuses in thirty states, Paul Loeb asked students about the values they held. He examines their concepts of responsibility, the links they draw between present and future, and how they view themselves in relation to the larger human community in which they live. He brings us a range of voices, from "I'm not that kind of person," to "I had to take a stand." Loeb looks at how the rest of us can serve young people as better role models, and give them courage and vision to help build a better world. This insightful book explores the culture of withdrawal that dominated American campuses through most of the eighties. He locates its roots in historical ignorance, relentless individualism, mistrust of social movements, and a general isolation from urgent realities. He examines why a steadily increasing minority has begun to take on critical public issues, whether environmental activism, apartheid, hunger and homelessness, affordable education, or racial and sexual equity. Loeb looks at individuals who have overcome precisely the barriers he has described, and how their journeys can become models. The generational choices he explores will shape our common future.

Jer Thorp's analysis of the word "data" in 10,325 New York Times stories written between 1984 and 2018 shows a distinct trend: among the words most closely associated with "data," we find not only its classic companions "information" and "digital," but also a variety of new neighbors--from "scandal" and "misinformation" to "ethics," "friends," and "play." To live in data in the twenty-first century is to be incessantly extracted from, classified and categorized, statisti-fied, sold, and surveilled. Data--our data--is mined and processed for profit, power, and political gain. In *Living in Data*, Thorp asks a crucial question of our time: How do we stop passively inhabiting data, and instead become active citizens of it? Threading a data story through hippo attacks, glaciers, and school gymnasiums, around colossal rice piles, and over active minefields, *Living in Data* reminds us that the future of data is still wide open, that there are ways to transcend facts and figures and to find more visceral ways to engage with data, that there are always new stories to be told about how data can be used. Punctuated with Thorp's original and informative illustrations, *Living in Data* not only redefines what data is, but reimagines who gets to speak its language and how to use its power to create a more just and democratic future. Timely and inspiring, *Living in Data* gives us a much-needed path forward.

First published in 1938, 'Anthem' is a dystopian fiction novel by British writer Ayn Rand. It takes place at some unspecified future date when mankind has entered another dark age. Technological advancement is now carefully planned and the concept of individuality has been eliminated.

From "an exceptional storyteller," Somewhere in the Unknown World is a collection of powerful stories of refugees who have found new lives in Minnesota's Twin Cities, told by the award-winning author of *The Latecomer* and *The Song Poet*. All over this country, there are refugees. But beyond the headlines, few know who they are, how they live, or what they have lost. Although Minnesota is not known for its diversity, the state has welcomed more refugees per capita than any other, from Syria to Bosnia, Thailand to Liberia. Now, with nativism on the rise, Kao Kalia Yang--herself a Hmong refugee--has gathered stories of the stateless who today call the Twin Cities home. Here are people who found the strength and courage to rebuild after leaving all they hold dear. Awo and her mother, who escaped from Somalia, reunite with her father on the phone every Saturday, across the span of continents and decades. Tommy, born in Minneapolis to refugees from Cambodia, cannot escape the war that his parents carry inside. As Afghani flees the reach of the Taliban, he seeks at every stop what he calls a certificate of his humanity. Mr. Truong brings pho from Vietnam to Frogtown in St. Paul, reviving a crumbling block as well as his own family. In Yang's exquisite telling, these fourteen stories for refugee journeys restore history and humanity to America's strangers and redeem its long tradition of welcome.

Hope for American democracy in an era of deep divisions In *Healing the Heart of Democracy*, Parker J. Palmer quickens our instinct to seek the common good and gives us the tools to do it. This timely, courageous and practical work--intensely personal as well as political--is not about them, "those people" in Washington D.C., or in our state capitals, on whom we blame our political problems. It's about us. "We the People," and what we can do in everyday settings--like families, neighborhoods, classrooms, congregations and workplaces to resist divide-and-conquer politics and restore agovernment "of the people, by the people, for the people." In the same compelling, inspiring prose that has made him abestselling author, Palmer explores five "habits of the heart" that can help us restore democracy's foundations as we nurture them in ourselves and each other: An understanding that we are all in this together An appreciation of the value of "otherness" An ability to hold tension in life-giving ways A sense of personal voice and agency A capacity to create community *Healing the Heart of Democracy* is an eloquent and empowering call for "We the People" to reclaim our democracy. The online journal *Democracy & Education* called it "one of the most important books of the early 21st century." And *Publishers Weekly*, in a *Starred Review*, said "This beautifully written book deserves a wide audience that will benefit from discussing it."
