"Spurious Correlations ... is the most fun you'll ever have with graphs."--Bustle Military intelligence analyst and Harvard Law student Tyler Vigen illustrates the golden rule that "correlation does not equal causation" through hilarious graphs inspired by his viral website. Is there a correlation between Nic Cage films and swimming pool accidents? What about beef consumption and people getting struck by lightning? Absolutely not. But that hasn't stopped millions of people from going to tylervigen.com and asking, "Wait, what?" Vigen has designed software that scours enormous data sets to find unlikely statistical correlations. He began pulling the funniest ones for his website and has since gained millions of views, hundreds of thousands of likes, and tons of media coverage. Subversive and clever, Spurious Correlations is geek humor at its finest, nailing our obsession with data and conspiracy theory.

In a narrative that is at once thoughtful and passionate, an award-winning historian reveals the history of peaceful coexistence between Muslims, Christians, and Jews over the course of fourteen centuries until the present day. The harsh reality of religious conflict is daily news, and the rising tensions between the West and Islam show no signs of abating. However, the relationship between Muslims, Christians, and Jews has not always been marked with animosity; there is also a deep and nuanced history of peace. From the court of caliphs in ancient Baghdad, where scholars engaged in spirited debate, to present-day Dubai, where members of each faith work side by side, Karabell traces the forgotten legacy of tolerance and cooperation these three monotheistic religions have enjoyed—a legacy that will be vital in any attempt to find common ground and reestablish peace.
