The book examines the status of public service in developing countries, in the sectors of health, infrastructure, labour and marginalized populations, rural economy and public administration. The last decade has witnessed significant government focus on service delivery in developing nations like South Africa, Philippines, India and Malaysia. At the forefront of this movement has been the public sector reforms significantly driven by two broad factors: public sector inefficiencies and liberal economic ideology. This move towards efficient public service delivery in developing nations (versus developed nations) has required a significant shift in institutional thinking and institutional capacity for the governments. It is therefore no surprise that while economic liberalization has been relatively easy to implement, governance reforms towards public service delivery has been significantly more challenging. In this background, the chapters of the book, with sector themes, examine the three basic foundations of public policy—courses of action, regulatory measures and issues, and funding structures and priorities—in public service delivery. The book is a multi country, multi sector, perspective since it includes studies from Russian Federation, India, Ethiopia, Pakistan, Fiji, South Africa, Columbia, Philippines, Macedonia and India. This perspective lends itself to the investigation for a comprehensive overall development model.

What happens when prominent brands: Send faulty products into the market? Defy governmental regulations? Back the wrong marketing message? Have management spats in public? Or simply fail to anticipate a major trend? Over the years, prominent brands in India across product categories, both home-grown and multinational, have tackled crises ? some unexpected and some self-inflicted, but each a defining factor in shaping a company's future. In a first-of-its-kind narrative, Rebuild brings together the stories behind some of India's biggest businesses that dealt with potential disaster and emerged on the other side ? either victorious or wiser. Digging deep into the crisis management strategies adopted by companies such as Coca-Cola, Unilever, Kingfisher, Tata Sons, Indian Premier League, Facebook, Uber, Nokia, Nestlé Maggi Noodles and several more, it analyses the steps that different organizations have taken to minimize damage to their brand, and describes how (if at all) they recovered. Featuring interviews with top management executives as well as expert brand-watchers, Rebuild closely examines the circumstances that cause brands to falter ? faulty products, leadership changes, disastrous sales cycles and competition activity, among others ? and provides invaluable insights that may serve as cautionary tales for organizations, both small and large.

Topics are broken down to short, clear chapters, that are all structured in the same way, so students can build their understanding with ease - Covers each syllabus area in the detail you need, with exercises that have enough depth and

variety to give full class and homework coverage - Brings the business world into the classroom with real examples used extensively throughout the text, in extra cases and in end-of-chapter exercises - Features to help reinforce student understanding - in every chapter there's Real Business, an Evaluation and Logic Chain, but also the brand new '5 Whys and a How' which will help students tackle exam questions

A story that proves that Indians when empowered can change the course of history The targets were stupendous and almost unachievable. Slightly over two years to find a suitable partner, finalize all legal documentation, build a factory, create a sales and service network and develop and launch a people's car that would sell 100,000 a year, in a sector where Indian expertise was limited.

This textbook covers the fundamentals of organizational development and change (ODC) theory while offering a comprehensive, structured, and systematic approach to guide change management strategies at the organization level. It provides an in-depth understanding of and the tools necessary for designing, diagnosing, implementing and evaluating organizational change interventions. Students will be exposed to case studies in ODC from selected international and Caribbean/Latin American organizations, demonstrating ODC in practice across a broad geographical context. This textbook, the first to offer a macro-level perspective of ODC, provides students with the tools needed to be successful in implementing change into today's organizations.
