HOLIDAYMAKER FIGHTS OFF AFRICAN LION IN WELSH HOTEL ROOMMAN SWALLOWS MOUSE AND DIESWIFE DRIVEN MAD BY HUSBAND TICKLING FEETPALLBEARER KILLED BY COFFIN IN GRAVEYARDLIBERALS EAT DOGFrom the newspaper archives of the British Library, Jeremy Clay has unearthed the long-lost stories that enthralled and appalled Victorian Britain. Within these pages are the riotous farces and tragedies of nineteenth-century life, a time when life was hard, pleasures short-lived, and gloating over other people's misfortune a thoroughly acceptable form of entertainment. Deliciously dreadful and deliriously funny, *The Burglar Caught by a Skeleton* will have you, one way or another, in tears.

'If you like black humour you will like Clay's eclectic compilation.' *The Times* 'It's a fun account of the more lurid side of Victorian life that, if you'll forgive me for mentioning Christmas this early, would make a good stocking filler.' *Liverpool Echo* A summer's afternoon, 1889. In a hotel in the sedate Welsh resort of Llandrindod Wells, holidaymaker Mr T.J. Osborne is preparing to catch the train home. The day is warm. The window is open. A fully-grown African lion leaps in. In the animated few minutes that follow, a startled Mr Osborne gets a crash-course in lion-taming, and after holding the ferocious beast at bay with a chair, becomes the star of a brisk article in the next morning's newspapers. The report of this unlikely encounter is just one of countless extraordinary tales which have lain unseen and unknown in the dusty recesses of newspaper libraries across the nation. Journalist Jeremy Clay has delved into the British Library archives to find the long-lost stories that enthralled and appalled the Victorians. The result is *The Burglar Caught By A Skeleton and Other Singular Stories* from the *Victorian Press*, a treasure trove of bizarre, quirky, pathetic and grisly stories from the newspapers of the age. They include: \* An

This book contains the papers given at a workshop organised by the Home Office (England and Wales) on the subject of residential burglary. This is a topic of much public concern, and I welcome the Home Office initiative in mounting the workshop. The contributors were all researchers and criminologists who have made a special study of burglary, and their brief was to consider the implications of their work for policy. As a policeman, I find their work of particular interest and relevance at this time when police performance, as traditionally measured by the clear-up rate, is not keeping pace with the increase in the numbers of burglaries coming to police attention. The finding that increases in burglary are more reflective of the public's reporting habits than of any significant rise in the actual level of burglary helps with perspective but offers little comfort to policemen. The 600% increase in the official statistics since 1970 is accompanied by a proportionate increase in police work in visiting victims, searching scenes of crime, writing crime reports, and completing other documentation. In some forces the point has been reached where available detective time is so taken up by the volume of visits and reports that there is little remaining for actual investigation. But because of the random and opportunist nature of

burglary, it cannot be said with any confidence that increasing investigative capacity would make a significant and lasting impact on the overall burglary figures.

The never-before-told full story of the history-changing break-in at the FBI office in Media, Pennsylvania, by a group of unlikely activists—quiet, ordinary, hardworking Americans—that made clear the shocking truth and confirmed what some had long suspected, that J. Edgar Hoover had created and was operating, in violation of the U.S. Constitution, his own shadow Bureau of Investigation. It begins in 1971 in an America being split apart by the Vietnam War . . . A small group of activists—eight men and women—the Citizens Commission to Investigate the FBI, inspired by Daniel Berrigan's rebellious Catholic peace movement, set out to use a more active, but nonviolent, method of civil disobedience to provide hard evidence once and for all that the government was operating outside the laws of the land. The would-be burglars—nonpro's—were ordinary people leading lives of purpose: a professor of religion and former freedom rider; a day-care director; a physicist; a cab driver; an antiwar activist, a lock picker; a graduate student haunted by members of her family lost to the Holocaust and the passivity of German civilians under Nazi rule. Betty Medsger's extraordinary book re-creates in resonant detail how this group of unknowing thieves, in their meticulous planning of the burglary, scouted out the low-security FBI building in a small town just west of Philadelphia, taking into consideration every possible factor, and how they planned the break-in for the night of the long-anticipated boxing match between Joe Frazier (war supporter and friend to President Nixon) and Muhammad Ali (convicted for refusing to serve in the military), knowing that all would be fixated on their televisions and radios. Medsger writes that the burglars removed all of the FBI files and, with the utmost deliberation, released them to various journalists and members of Congress, soon upending the public's perception of the inviolate head of the Bureau and paving the way

for the first overhaul of the FBI since Hoover became its director in 1924. And we see how the release of the FBI files to the press set the stage for the sensational release three months later, by Daniel Ellsberg, of the top-secret, seven-thousand-page Pentagon study on U.S. decision-making regarding the Vietnam War, which became known as the Pentagon Papers. At the heart of the heist—and the book—the contents of the FBI files revealing J. Edgar Hoover’s “secret counterintelligence program” COINTELPRO, set up in 1956 to investigate and disrupt dissident political groups in the United States in order “to enhance the paranoia endemic in these circles,” to make clear to all Americans that an FBI agent was “behind every mailbox,” a plan that would discredit, destabilize, and demoralize groups, many of them legal civil rights organizations and antiwar groups that Hoover found offensive—as well as black power groups, student activists, antidraft protestors, conscientious objectors. The author, the first reporter to receive the FBI files, began to cover this story during the three years she worked for The Washington Post and continued her investigation long after she'd left the paper, figuring out who the burglars were, and convincing them, after decades of silence, to come forward and tell their extraordinary story. The Burglary is an important and riveting book, a portrait of the potential power of nonviolent resistance and the destructive power of excessive government secrecy and spying.
