As wolves return to their old territory in Yellowstone National Park, their presence is reawakening passions as ancient as their tangled relations with human beings. This authoritative and eloquent book coaxes the wolf out from its camouflage of myth and reveals the depth of its kinship with humanity, which shares this animal's complex complex social organization, intense family ties, and predatory streak.

This volume of essays presents innovative research from a variety of perspectives on the cultural significance of wolves, children raised by wolves, and werewolves, as portrayed in different media and genres.

The woods before and above them opened fire, and a thousand voices rose in a Cherokee war-whoop. Three of the lead men in Marion's section were not lucky this time, as several balls hit them at once. Ducking next to a tree, Jacob could hear the thuds of balls striking it instead of him. Looking around the tree, he could see the silhouettes of the Cherokee amongst the trees, their war paint blending in with the shadows of the trees. Looking across the ravine, Jacob could see Moultrie and his men had taken cover and had a couple of men wounded by the opening volley. Then looking behind them, he could see Kennedy's men seeking protection, while he could hear the British commanders issuing their orders. Jacob became concerned that they could get caught in a crossfire between the British regiments and the Cherokee. Take an extraordinary journey back to French and Indian War America, from New York to South Carolina, with Jacob Clarke, a Ranger Captain from Rogers Rangers. He is joined by Sergeant Samuel Penny, who was assigned to advise Colonel Grant and South Carolina in their fight against the Cherokee in 1760-1761. This well-researched novel makes history jump off the page.

It's 1592. Europe is in chaos. Religious factions have torn the region apart and witch-hunts have become a part of everyday life. In the Company of Wolves follows three groups of travelers - a fearless female pirate roaming the North Sea, a priest and his wife escaping to England to avoid persecution, and a young thief from the slums of Germany looking for a better life. Each has a different reason for venturing out in such tumultuous times-fear, greed, family secrets. Is the Werewolf of Bedburg still alive, roaming the countryside and killing innocent citizens? Many believe he's still out there-that religious and political leaders have forsaken the truth in their cunning quest for power. As each traveler searches for individual answers, these three seemingly separate stories converge in a place which may hold the key for them all. Based on true events involving one of the deadliest witch trials in European history, this tale of adventure, mystery, and the search for truth reminds us that, ultimately, no one is safe . . . in the company of wolves.

Draws on scientific and historical sources, as well as the author's own observations as a National Magazine Award-nominated naturalist and writer, to explain why people draw, covering such topics as what the mind does while drawing, the prevalence of faces and nudes in art, and the dynamic between artist and model. Reprint. 20,000 first printing.

THERE IS NO better way to introduce children to classical music than with Prokofiev's musical fairy tale of the little boy who, with the help of a bird, outsmarted the big, bad wolf. A new retelling by Janet Schulman follows the basic story, but with a kinder ending for both the big, bad wolf and the argumentative duck. Peter Malone's paintings have the luminous quality of old Russian masters.

1508. When Francesco Angeli, houseboy to Michelangelo, sees the body of a golden-haired woman being pulled from the Tiber on a rainy morning, he is shocked to realize that he knows her. As Francesco follows a deepening mystery from Rome's back streets to the pope's inner sanctum, he begins to realize that danger and corruption may lurk behind the most beautiful of facades.

This is the only book-length study of Carter's work in media, a critically neglected body of work comprising five radio plays, two film adaptations, and a television documentary, as well as two unrealised screenplays, an operatic libretto, and a stage play.

A human named Manny Wolf answers a job application that says "Wolf wanted" and gets a job answering the applications of the wolves from literature who apply for the job.
