illustrate how they interconnect and may be promoted, or compromised, by health and illness, and influenced by external factors Explains the theory to show how it can be applied in practice to assess, plan, deliver and evaluate individualised nursing care A helpful case study approach enables readers see how the model works in 'real life' Written by experts who actively encourage a problem-solving approach to nursing care and practice Additional exercises are designed to encourage further learning and reflective practice, as well as develop skills in literature searching and evidence-based care Helpful appendices include a range of reference material such as the Care Plan Documentation and Audit Tool, Laboratory Reference Values, the Roper-Logan Tierney Assessment Schedule and other commonly used nursing documentation Ideal for use in a variety of contemporary health care delivery environments including the acute and community-based settings

For beginning nursing students. While it does not cover all aspects of nursing knowledge and practice it encourages a logical mode of thinking about nursing in the framework of a model for nursing.

This U.K. textbook explores the use of the Roper-Logan-Tierney Model

Get Free The Roper Logan Tierney Model Of Nursing Based On Activities Of Living 1e By Roper Mphil Rgn Rscn Rnt Nancy

of Nursing in practice. The main focus is on nursing adult patients, with a variety of healthcare problems and needs, in acute and community-based settings. It has been written to enable students and their teachers in both higher education and clinical practice to explore the different dimensions of the model through a variety of case studies and exercises. The case studies can be viewed as 'triggers' for student problem solving skills in using the model. Many of the exercises are aimed at enabling readers to find evidence to support nursing activities. The authors have incorporated an international perspective throughout the text.
