As they do so, the smaller dune ascends and spreads over the larger one. During this process, however, the fluid flow, which is deflected by the new dune, strongly erodes the front of the dune, which ejects a new dune. Because it is smaller and emerges downstream, the new dune moves faster and a gap opens up between the two dunes," Franklin said.

"First published in the United States of America by Chilton Books 1965"--Title page verso.

A compendium of Herbert's essays, articles, observations, reminiscences and meditations, as well as a never-before-published interview with the late writer

The definitive graphic novel adaptation of Dune, the groundbreaking science-fiction classic by Frank Herbert Dune, Frank Herbert's epic science-fiction masterpiece set in the far future amidst a sprawling feudal interstellar society, tells the story of Paul Atreides as he and his family accept control of the desert planet Arrakis. A stunning blend of adventure and mysticism, environmentalism, and politics, Dune is a powerful, fantastical tale that takes an unprecedented look into our universe, and is transformed by the graphic novel format. In the first volume of a three-book trilogy encompassing the original novel, Brian Herbert and Kevin J. Anderson's adaptation retains the story's integrity, and Raúl Allén and Patricia Martín's magnificent illustrations, along with cover art by Bill Sienkiewicz, bring the book to life for a new generation of readers.

Frank Herbert's Dune is the biggest-selling science fiction story of all time; the original book and its numerous sequels have transported millions of readers into the alternate reality of the Duniverse. Dune and Philosophy raises intriguing questions about the Duniverse in ways that will be instantly meaningful to fans. Those well-known characters--Paul Atreides, Baron Harkonnen, Duncan Idaho, Stilgar, the Bene Gesserit witches--come alive again in this fearless philosophical probing of some of life's most basic questions. Dune presents us with a vast world in which fanaticism is merciless and history is made by the interplay of ruthless conspiracies. Computers have long been outlawed, so that the abilities of human beings are developed to an almost supernatural level. The intergalactic empire controlled by a privileged aristocracy raises all the old questions of human interaction in a strange yet weirdly familiar setting. Do secret conspiracies direct the future course of human political evolution? Can manipulation of the gene pool create a godlike individual? Are strife and bloodshed essential to progress? Can we know so much about the future that we lose the power to make a difference? Does reliance on valuable resources--such as "spice," oil, and water--place us at the mercy of those who can destroy those resources? When gholas are reconstructed from the cells of dead people and given those people's memories, is the gholas the dead person resurrected? Can the exploitation of religion for political ends be reduced to a technique? Philosophers who are fans of Dune will trek through the desert of the Duniverse seeing answers to these and other questions.

Gilbertus Albans has founded the Mentat School, a place where humans can learn the efficient techniques of thinking machines. But Gilbertus walks an uneasy line between his own convictions and compromises in order to survive the Butlerian fanatics, led by the madman Manford Torondo and his Swordmaster Anari Idaho. Mother Superior Raquella attempts to rebuild her Sisterhood School on Wallach IX, with her most talented and ambitious student, Valya Harkonnen . . . who also has another goal-to exact revenge on Vorian Atreides, the legendary hero of the Jihad, whom she blames for her family's downfall. Meanwhile, Josef Venport conducts his own war against the Butlerians. VenHold Spacing Fleet controls nearly all commerce thanks to the superior mutated Navigators that Venport has created, and he places a ruthless embargo on any planet that accepts Manford Torondo's anti-technology pledge, hoping to starve them into submission. But fanatics rarely surrender easily. . . The Mentats, the Navigators, and the Sisterhood all strive to improve the human race, but know that as Butlerian fanaticism grows stronger, the battle will be to choose the path of humanity's future-whether to embrace civilization, or to plunge into an endless dark age.

This companion to Frank Herbert's six original Dune novels—Dune, Dune Messiah, Children of Dune, God Emperor of Dune, Heretics of Dune and Chapterhouse: Dune—provides an encyclopedia of characters, locations, terms and other elements, and highlights the series' underrated aesthetic integrity. An extensive introduction discusses the theme of ecology, chaos theory concepts and structures, and Joseph Campbell's monomyth in Herbert's narratives.

A biography of the science fiction writer, presented by his son, describes Herbert's childhood in Tacoma, Washington, his early years as a reporter and editor, his military service, and his struggles to become published.

Brian Herbert and Kevin J. Anderson's Navigators of Dune is the climactic finale of the Great Schools of Dune trilogy, set 10,000 years before Frank Herbert's classic Dune. The story line tells the origins of the Bene Gesserit Sisterhood and its breeding program, the human-computer Mentats, and the Navigators (the Spacing Guild), as well as a crucial battle for the future of the human race, in which reason faces off against fanaticism. These events have far-reaching consequences that will set the stage for Dune, millennia later. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Follows the adventures of Paul Atreides, the son of a betrayed duke given up for dead on a treacherous desert planet and adopted by its fierce, nomadic people, who help him unravel his most unexpected destiny.
