The Mercedes-Benz Unimog, a name derived from its official title of Universal Motorised Gerat (the latter meaning machine or piece of equipment in German), was initially designed shortly after World War II but popularised in the 1950s and 1960s.

Combining materials from Mercedes-Benz's official archives with information collected from professionals involved with the marque, this book provides a unique, never before seen, perspective on how the brand developed its products to provide transportation solutions across some of the most diverse operating conditions in the world. With rare and previously unpublished photos of working trucks in action, this comprehensive book also features historical information, explanations of model codes, descriptions of models and variations from around the world, and shows some of the biggest, 'baddest' and most unusual Mercedes-Benz trucks from around the globe.

Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 25. Chapters: Unimog, Mercedes-Benz G-Class, List of World War II military vehicles of Germany, M270 Multiple Launch Rocket System, List of Sd.Kfz. designations, LIV Serval, Volkswagen 181, Fennek, Mungo ESK. Excerpt: The Mercedes-Benz G-Class or G-Wagen, short for Gelandewagen (or cross-country vehicle), is a four-wheel drive vehicle / sport utility vehicle (SUV) produced by German automaker Mercedes-Benz. The G-wagen is characterized by its boxy styling and body-on-frame construction. It utilizes three fully locking differentials, one of the few vehicles to have such a feature. The G-class was developed as a military vehicle and offered as a civilian version in 1979. The G-class replaced the cheaper Volkswagen Iltis in 1990. In this role it is sometimes referred to as the "Wolf" and LAPV Enok. The G-Class has been sold under the Puch name in certain markets, and the Peugeot P4 is a variant made under license, with a Peugeot engine and different parts. Despite the introduction of an intended replacement, the unibody crossover SUV Mercedes-Benz GL-Class in 2006, the G-Class is still produced and is expected to continue in production. An interior face lift is possibly in the works for the G-Class, so there is no set date for when this car will cease production. The G-Wagen was developed by Steyr-Daimler-Puch and first offered for sale in 1979 and redesigned in 1990/1991. A new version was expected for 2007, but the new GL-Class will not replace the G-Wagen, and it will continue to be hand-built in Graz, Austria at an annual production of 4,000 to 6,000 units. In February 2009, Magna Steyr, an operating unit of Magna International, announced that it signed an agreement with Daimler AG to extend the production of the Mercedes-Benz G-Class at Magna Steyr in Graz, Austria until 2015. Besides the production, the further development...

- A thrilling photographic account of the treasure trove of cars kept by the Mercedes-Benz Museum in Stuttgart that are not currently on display to the public. The Mercedes-Benz Museum in Stuttgart is one of the largest and most visited industrial museums in the world. But the 160 or so automobiles on display are only a small part of the shiny chrome treasures that form the Mercedes-Benz Classic vehicle collection. Another 1,000 historical models are 'parked' in secret places outside Stuttgart - these secret places are called the 'Holy Halls'. This collection is the treasure trove of the brand. It has existed since 1923 and offers a comprehensive overview of the model history of Mercedes-Benz. Cars with special technology and equipment are stored here, as are the silver arrows of Caracciola, Lang and Fangio, the Pope's carriages, the state cars of the young Federal Republic of Germany or Mercedes models that became collectors' items due to their prominent previous owners. Some of these exhibits are well protected and waiting in special wooden boxes for their next use at exhibitions, fairs, events or classic car races. Others stand next to each other as silent witnesses of the past. Each time a model is modified, the collection is extended by the last vehicle of the discontinued series, which experts believe will be one of tomorrow's classic cars. The 'Holy Halls' are not open to the public; enquiries from editorial offices and TV teams have often been rejected. But, during the years 2016 to 2018, almost all the vehicles of the Mercedes collection were photographed. Thus, a unique photographic collection was created, the automobile history from more than ten decades; many of the previously unpublished photographs are exclusively available here in this book. In addition, Mercedes-Benz Classic agreed to open the 'Holy Halls' for an external photo team and provide information about the car models stored there. For the first time, it has been possible to produce a fascinating illustrated book with panoramic and detailed shots from the 'halls', and lively photo reports on cars that tell stories - from the first Benz motor car to the latest Formula 1 racing car. Equally thrilling are the stories of the unique specimens and prototypes that are stored in the 'Holy Halls': Mercedes models that never went into production are presented for the first time. The stories about the selected automobiles of the vehicle collection are supplemented by historical recordings from the Mercedes-Benz Classic archive.
