Douglas uncovers the underlying reasons for lack of consistency and helps traders overcome the ingrained mental habits that cost them money. He takes on the myths of the market and exposes them one by one teaching traders to look beyond random outcomes, to understand the true realities of risk, and to be comfortable with the "probabilities" of market movement that governs all market speculation.

A practical guide to profiting from institutional trading trends The key to being a successful trader is

finding a system that works and sticking with it. Author Al Brooks has done just that. By simplifying his trading system and trading only 5-minute price charts he's found a way to capture profits regardless of market direction or economic climate. His first book, *Reading Price Charts Bar by Bar*, offered an informative examination of his system, but it didn't allow him to get into the real nuts and bolts of the approach. Now, with this new series of books, Brooks takes you step by step through the entire process. By breaking down his trading system into its simplest pieces:

institutional piggybacking or trend trading (the topic of this particular book in the series), trading ranges, and transitions or reversals, this three book series offers access to Brooks' successful methodology. Price Action Trends Bar by Bar describes in detail what individual bars and combinations of bars can tell a trader about what institutions are doing. This is critical because the key to making money in trading is to piggyback institutions and you cannot do that unless you understand what the charts are telling you about their behavior. This book will

What is the Wyckoff
Methodology? It is a
Technical Analysis approach
based on the study of supply
and demand; that is, on the
continuous interaction
between buyers and sellers.
The approach is simple: when
well-informed traders want
to buy or sell, they carry
out processes that leave

You will learn to analyze the traces left by the interactions between the major traders. Law of Cause and Effect. The idea is that something cannot happen out of the blue; that for the price to develop a trend movement (effect) it must first have built a cause previously. Law of Effort and Result.
