An astonishing new scientific discovery called neuroplasticity is overthrowing the centuries-old notion that the adult human brain is fixed and unchanging. It is, instead, able to change its own structure and function, even into old age. Psychiatrist and researcher Norman Doidge, MD, travelled around the United States

scientists championing  
neuroplasticity, and the  
people whose lives  
they've transformed -  
people whose mental

whose conditions had

Using personal stories from the heart of this neuroplasticity revolution, Dr Doidge has written an immensely moving, inspiring book that will
