The monograph describes several strategies which use writing as a tool for critical thinking. The monograph contains the following chapters: (1) "The School Essay (Bad Memories of)"; (2) "The Case against Writing--Plato's Challenge"; (3) ""For it is myself that I portray': Montaigne's Legacy"; (4) "Invitations to the Essay"; and (5) "'I'm not going to talk about it.'" Forty-three references and an annotated bibliography derived from searches of the ERIC database are attached. (MS)

Description: Students often face a daunting dilemma in academia when it comes to writing. In their composition courses they are encouraged to express their emotions, find themselves, construct their own meanings, discover their voices, and own their identities through writing. But when they are asked to write lab reports, history papers, sociological studies, or to write discipline specific documents for their majors, their professors aren't much interested in self-expression, self-esteem, identity politics, or endlessly open-ended non-answers in search of a question. Their professors want clear writing that makes sense and that evidences critical thinking. What are students to do? Writing That Makes Sense takes students through the basics of the writing process and critical thinking, and it teaches them how to write various types of academic essays they are likely to encounter in their academic careers. Drawing on nearly twenty years of experience in teaching college composition and professional writing, David S. Hogsette combines relevant writing pedagogy and practical assignments with the basics of critical thinking and logical thought to provide students with step-by-step guides for successful writing in academia. Writing That Makes Sense includes many professional essays and articles from a variety of voices often underrepresented in academia today, thus introducing students to a wider intellectual diversity. Students will also benefit from a chapter on information literacy that provides practical tips on engaging the research process and writing research papers. About the Contributor(s): David S. Hogsette is Associate Professor of English and Writing Coordinator at the Old Westbury campus of the New York Institute of Technology, where he teaches composition, professional writing, and various upper-level literature courses. His teaching directly impacts his scholarship, and he has published articles and delivered lectures at national and international conferences on literary topics related to English Romanticism, Gothic literature, fantasy literature, science fiction, and theocentric approaches to literary studies.

"MsoNormal" **Anthem Guide to Critical Thinking Skills: Language and Logic** guides readers in the process of critical thinking and persuasive speaking and writing. The text discusses informal thinking, the formal processes of induction, deduction, and syllogistic reasoning, in a clear format that makes it easy for the "beginning logician" to process. Students learn how to form a proposition, identify issues, gather evidence, and process an argument. To get started, logic games, puzzles, and real life examples ask students to consider how we evaluate, analyze, and decide. What happens if Janie says, "Mom, can I go to the party? All of my friends are going!" And Mom responds, "What if all of your friends jumped off the empire State building?" Is ' all of my friends are going' a good reason? Does mom have a point? Language and Logic will help students evaluate these everyday decisions. Then a more formal look at induction and deduction challenges students to practice higher-level thinking skills, such as using analogies for evaluation, and working through syllogisms to process ideas. After a review of the Greek Fallacies, readers can have some literary logic fun by analyzing old standards like "Love is a Fallacy" and the persuasive love poem "The Passionate Shepherd"— Provided by publisher.
