Electromagnetic vibration transducers are seen as an effective way of harvesting ambient energy for the supply of sensor monitoring systems. Different electromagnetic coupling architectures have been employed but no comprehensive comparison with respect to their output performance has been carried out up to now.

Electromagnetic Vibration Energy Harvesting Devices introduces an optimization approach which is applied to determine optimal dimensions of the components (magnet, coil and back iron). Eight different commonly applied coupling architectures are investigated. The results show that correct dimensions are of great significance for maximizing the efficiency of the energy conversion. A comparison yields the architectures with the best output performance capability which should be preferably employed in applications. A prototype development is used to demonstrate how the optimization calculations can be integrated into the design – flow. Electromagnetic Vibration Energy Harvesting Devices targets the designer of electromagnetic vibration transducers who wishes to have a greater in-depth understanding for maximizing the output performance.

In the end, the electoral logic that fueled Democratic choice proved consequential for the trajectory of American state development. For, under the pressure to build a new majority party, an agrarian party with long-standing antistatist and antimonopoly commitments turned its governing power to the buildup of national administrative power and the consolidation of corporate capitalism."--BOOK JACKET.

From Mary Blayney, the acclaimed author of *Stranger's Kiss*, comes this irresistible new novel of historical romance featuring the Pennistan family. In *Courtesan's Kiss*, an independent woman is determined to make her way in the world—even if it's a scandalous one. But first she must escape a nobleman with plans of his own. In the wake of a broken engagement and shunned by the

ton, Mia Castellano does not retire to the country, as a proper young lady might, but sees her chance to escape society ' s restraints—by becoming a courtesan. In her mind, no unmarried young woman is as free as a courtesan. She alone controls her destiny: managing her own money, having her own house, choosing her lovers. There ' s only one obstacle in Mia ' s path—Lord David Pennistan. As a favor to his brother, Lord David agrees to escort Mia to his family ' s home in Derbyshire, where her guardian awaits. Mia attracts nothing but trouble from the outset of their journey, yet with every adventure they share, Lord David ' s desire for his charge grows. When they ' re caught in a compromising situation, Lord David insists that she marry him. But there ' s only one thing Mia wants from David, and it isn ' t his charity or his title. Can he convince her before it ' s too late that the love she

wants is already hers—to take or to lose forever? Can he win more from this untamed beauty than just a courtesan ' s kiss?

Loraux presents a radical challenge to what has become the dominant view of tragedy in recent years: that tragedy is primarily a civic phenomenon.
